The Poetics of Grief and Melancholy in East-West Conflicts and Reconciliations Chi Sum Garfield Lau 2024-03-01

This book is a collection of academic essays that examines the representation, esthetics and dichotomy of the notions of grief and melancholy in East-West exchanges and cultural dialogues. It explores the topic in the dimensions of individual behaviors under specific social norms and cultural products such as literature, film and any other forms of arts/genres, etc. In his 1917 work *Mourning and Melancholia* (*Trauer und Melancholie*), Sigmund Freud connected the grief of loss with melancholic emotions which may give rise to acts of mourning. He suggested that “[i]n mourning it is the world which has become poor and empty; in melancholia it is the ego itself” (Freud, 1917: 246). Inspired by Freud’s stance and with the goal of providing up-to-date intellectual resources for academics, researchers and students with ardent interests in the varying exemplifications of grief and melancholy in Sino-Western contexts, the book serves more than a discussion over the pragmatic and ritualistic connections of grief and melancholy in relation to the inner self and the external world. It aims at the pursuit of a contemporary

theorization of grief and melancholy beyond its modern limits.

*Wounded Knights* Alfred Thomas 2025-11-07 This broad-ranging book draws on Freudian and post-Freudian theory to offer a new and original perspective on courtly love from its origins in eleventh-century Occitania to its transformation into conflicting chivalric and courtly discourses in the later Middle Ages. Comparative and transnational in scope, it explores the role of masculinity and violence in the romance, love lyric and saints' lives written in French, English, German, and Czech between 1200 and 1400. Whereas conventional studies of medieval courtly love have emphasized the positive and idealistic relationship between the knight and the lady, this book highlights the dark side of medieval masculinity and how displaced male violence toward women and male masochism in these texts are transfigured into more explicit violence in modern horror films.

**The New Pluralism** David Campbell 2008-05-26 William Connolly, one of the best-known and most important political theorists writing today, is a principal architect of the "new pluralism." In this volume, leading thinkers in contemporary political theory and international relations provide a comprehensive investigation of the new pluralism, Connolly's contributions to it, and its influence on the fields of political theory and international relations. Together they trace the evolution of Connolly's ideas, illuminating his challenges to the "old," conventional pluralist theory that dominated American and British political science and sociology in the second half of the twentieth century. The contributors

show how Connolly has continually revised his ideas about pluralism to take into account radical changes in global politics, incorporate new theories of cognition, and reflect on the centrality of religion in political conflict. They engage his arguments for an agonistic democracy in which all fundamentalisms become the objects of politicization, so that differences are not just tolerated but are productive of debate and the creative source of a politics of becoming. They also explore the implications of his work, often challenging his views to widen the reach of even his most recently developed theories. Connolly's new pluralism will provoke all citizens who refuse to subordinate their thinking to the regimes in which they reside, to religious authorities tied to the state, or to corporate interests tied to either. The New Pluralism concludes with an interview with Connolly in which he reflects on the evolution of his ideas and expands on his current work.
