Assessing Learners Online Albert Oosterhof 2008 Online assessment and, more broadly, the entire online learning environment provides expanded opportunities to actively and creatively engage the learner. The approach the authors have taken in this book is to work from the established fundamentals of assessment, applying these principles to the online environment. The authors emphasize basic issues of assessment such as establishing the evidence of validity for assessments, but the context of the discussion is always that of an online environment. Written by leading technology experts, this clear and practical text serves as a training guide for assessing online or distance learners. Readers learn how to select what should be assessed, how to use written tests and projects to evaluate the skills learners have achieved, how to provide feedback to learners, and how to efficiently use course management software. The authors believe educators involved with online training and education must have the same assessment expectations and standards as those in conventional, face-to-face environments. This book is appropriate for instructional designers and educators involved with online training and education as well as for college courses concerned with the design and delivery of distance or other forms of online instruction. It also has utility as a personal reference for instructors of courses that assess students online.

Marriages and Families Karen Secombe 2004 In this fresh, more structural, alternative to other texts for the marriage and family course, Secombe and Warner provide a comprehensive look at close relationships and the family in just 15 chapters. Examining close relationships and families by placing them in social context, the authors offer a unique emphasis on the structural and relational aspects of the family with a focus on family resilience. The text weaves together a macro view - social structural analysis of close relationships- with the macro - an individualist view. The authors demonstrate the interaction of theory and methodology in family studies in Chapter 2 and blend cutting-edge research and practical applications throughout. Among the highlights of this first edition are the exceptionally thorough exploration of the topics of singlehood and cohabitation in Chapter 7 and the unique six-chapter core (8-13) that focuses on all aspects of parenthood and the challenges and crises that families face today. The authors' emphasis on family resilience and how families can be strengthened is reflected in the Constructing Strong Families boxes that appear throughout the text. These features encourage students to apply groundbreaking research on what makes a family strong to their own families and in the concluding chapter, Looking Ahead: Helping Families Flourish, which examines the factors that successful families -regardless of ethnicity, culture, or social class--consistently exhibit.

The Inclusive Classroom Margo A. Mastropieri 2010 This text offers a wealth of practical and proven strategies for successfully including students with disabilities in general education classrooms. The text provides targeted strategies for the subject and skill areas, as well as special needs of individual students, with a strong focus on instructional strategies applied to specific student need areas. An overall theme of "effective, differentiated instruction" is infused throughout the text, relating to those practices that are most closely aligned with academic success. The text is unique in its three-part coverage of 1). the fundamentals of teaching students with special needs, 2). effective general teaching practices, and 3).inclusive practices in specific subject areas. With a strong focus on instructional strategies and how they are applied to specific student need areas, the text goes further by featuring more specific strategies than any other text, and extensive information about the most effective strategies available, and when and how to use them.. This strong focus instructs pre-service teachers and other education personnel on how they can implement in the classroom specific strategies to address a very wide range of grade levels, skill levels, academic content areas; and extensive and very specific information on strategies teachers can use in the areas of most concern to them, e.g., behavior management, handling student confrontations, promoting literacy, memory for school content, motivation to learn, maintaining student attention, adapting assessment and improving test scores, and specific strategies for adapting specific lessons in math,

science, social studies, and career and technical education. Specifically written for pre-service or in-service special education teachers who will work with general education teachers in K-12 classrooms, the text is also relevant for school psychologists, counselors, support staff, and other school personnel interested in helping all students succeed in the classroom.
