Comparative Vertebrate Anatomy: A Laboratory Dissection Guide

Kenneth Kardong 2011-02-15 This high-quality laboratory manual may accompany any comparative anatomy text, but correlates directly to Kardong's *Vertebrates: Comparative Anatomy, Function, Evolution* text. This lab manual carefully guides students through dissections and is richly illustrated. First and foremost, the basic animal architecture is presented in a clear and concise manner. Throughout the dissections, the authors pause strategically to bring the students' attention to the significance of the material they have just covered.
