11th Mediterranean Conference on Medical and Biological Engineering and Computing 2007 Tomaz Jarm 2007-10-24
Biomedical engineering today is a well-recognized area of research. It brings together bright minds from diverse disciplines ranging from engineering, physics, and computer sciences on one side to biology and medicine on the other side. With valuable assistance of members of the International Advisory Committee and Scientific Program Committee, the co-organizing institutions and societies, our sponsors, and distinguished invited lecturers we will ensure that the research and development presented at MEDICON 2007 plenary meetings, scientific sessions, and workshops will truly be relevant and up-to-date. The MEDICON conferences are international events of high scientific standards with long lasting tradition held every third year in one of the Mediterranean countries under the auspices of the International Federation for Medical

and Biological Engineering.

Leveraging Technology for Property Tax Management in Asia and the Pacific-Guidance Note Asian Development Bank 2024-03-01
This guidance note explains why countries in Asia and the Pacific should use technology, including remote sensing and artificial intelligence, to reform property tax management and help strengthen public finances. Outlining why property tax is a stable revenue source, it shows how technology can be used to roll out computerized mass appraisal systems, automated value modeling, and integrated land information systems. It assesses the complex hurdles and financial constraints facing countries and shows how the Asian Development Bank is helping better integrate land management into wider e-government systems.

Industrial Process Automation Systems B.R. Mehta 2014-11-26

Industrial Process Automation Systems: Design and Implementation is a clear guide to the practicalities of modern industrial automation systems. Bridging the gap between theory and technician-level coverage, it offers a pragmatic approach to the subject based on industrial experience, taking in the latest technologies and professional practices. Its comprehensive coverage of concepts and applications provides engineers with the knowledge they need before referring to vendor documentation, while clear guidelines for implementing process control options and worked examples of deployments translate theory into practice with ease. This book is an ideal introduction to the subject for junior level professionals as well as being an essential reference for more experienced practitioners. - Provides knowledge of the different systems available and their applications, enabling engineers to design automation solutions to solve real industry problems - Includes case studies and practical information on key items that need to be considered when procuring automation systems - Written by an experienced practitioner from a leading technology company

Research & Innovation Forum 2019 Anna Visvizi 2019-10-28 This book features research presented and discussed during the Research & Innovation Forum (Rii Forum) 2019. As such, this volume offers a unique insight into emerging topics, issues and developments pertinent to the fields of technology, innovation and education and their social impact. Papers included in this volume apply inter- and multi-disciplinary approaches to query such issues as technology-enhanced teaching and learning, smart cities,, information systems, cognitive computing and social networking. What brings these threads of the discussion together is the question of how advances in computer science - which are otherwise largely incomprehensible to researchers from other fields - can be effectively translated and capitalized on so as to make them beneficial for society as a whole. In this context, Rii Forum and Rii Forum proceedings offer an essential venue where diverse stakeholders, including academics, the think tank sector and decision-makers, can engage in a meaningful dialogue with a view to improving the

applicability of advances in computer science. In brief, Rii Forum takes the imperative inherent in the 4th industrial revolution seriously, in that it identifies ways of making technology usable and therefore inclusive.
