Performance-Based Earned Value Paul

Solomon 2007 A complete toolkit for

implementation of Earned Value Management Performance-Based Earned Value uniquely shows project managers how to effectively integrate technical, schedule, and cost objectives by improving earned value management (EVM) practices. Providing innovative guidelines, methods, examples, and templates consistent with capability models and standards, this book approaches EVM from a practical level with understandable techniques that are applicable to the management of any project. Clear and unambiguous instructions explain how to incorporate EVM with key systems engineering, software engineering, and project management processes such as establishing the technical or quality baseline, requirements management, using product metrics, and meeting success criteria for technical reviews. Detailed information is included on linking product requirements, project work products, the project plan, and the Performance Measurement Baseline (PMB), as

well as correlating technical performance measures (TPM) with EVM. With straightforward instructions on how to use EVM on a simple project, such as building a house, and on complex projects, such as high-risk IT and engineering development projects, it is the only book that includes excerpts from the PMI®'s Project Management Body of Knowledge (PMBOK®), CMMI, the EVM System standard, systems engineering standards, federal acquisition regulations, and Department of Defense guides. Performance-Based Earned Value allows both novices and experienced project managers, including project manager of suppliers and customers in the commercial and government sectors; software and systems engineering process improvement leaders; CMMI appraisers; PMI members; and IEEE Computer Society members to: Incorporate product requirements and planned quality into the PMB Conduct an Integrated Baseline Review Analyze performance reports Perform

independent assessments and predictive analysis

with government acquisition policies and
regulations Written by Paul Solomon and Ralph
Young, internationally recognized industry
experts, Performance-Based Earned Value is
constructed from guidance in standards and
capability models for EVM, systems engineering,
software engineering, and project management.
It is the complete guide to EVM, invaluable in
helping students prepare for the PMI®-PMP®

The Government Manager's Guide to Earned Value Management Charles I. Budd PMP
2013-12-01 This volume presents practical guidance for the government manager on earned value management (EVM), from basic calculations to how to find the most useful information online. Emphasis is on the relevant reports that contractors are required to submit to the federal government as part of their compliance with mandated EVM on projects. Because the data submitted on reports do not translate automatically into recommendations for actions to be taken, information is included

October 2006 United States Government Defense Contract Management Agency (Dcma) 2006-10-31 This guide provides the uniform procedures which have been approved by the Director, Defense Contract Management Agency (DCMA) under assigned authority as the Department of Defense's Executive Agent for Earned Value Management Systems (EVMS). This document has been coordinated by SAF/AQ, SAF/FM, ASA (ALT), ASN (RD&A), MDA/PO, NSA/CSS, and DCAA. This document provides guidance to be used during the implementation and surveillance of EVMS established in compliance with DoD Guidelines. Part I of this guide provides guidance for understanding EVMS concepts, describes objective guidelines for EVM systems, and provides guidance in interpreting those guidelines for use on Government contracts and programs. Part 2 contains a description of procedures and processes for Government personnel for specifying, evaluating, and implementing EVM

systems. Part 2 also contains instructions and tailoring guidance for applying EVM requirements to contracts, an introduction to analyzing performance, baseline review and maintenance, and other post award activities. Additional reference material is contained in the appendices. It should be noted that Department of Defense (DoD) EVM policy not only applies to contracts with industry, but to intra-government activities as well. Throughout this document, the term "contract" refers to both contracts with private industry as well as agreements with intra-governmental activities that meet the DoD reporting thresholds. Similarly, the term "contractor" refers to entities within both private industry and Government. This document was developed to serve as the central EVMS guidance document for DoD personnel. Throughout the Earned Value Management Implementation Guide (EVMIG), additional references are made to additional sources of information, such as EVMS standards,

handbooks, guidebooks, and websites. These additional sources should be consulted as appropriate.
