2019-08-28 This exploration of what employee turnover is, why it happens, and what it means for companies and employees draws together contemporary and classic theories and research to present a well-rounded perspective on employee retention and turnover. The book uses models such as job embeddedness theory, proximal withdrawal states, and context-emergent turnover theory, as well as highlights cultural differences affecting global differences in turnover.

The material is written to make it informative, enjoyable, and readily useable in the classroom and in clinical settings. Numerous examples and vignettes are included to foster reader interest. The Thirteen Tasks of Supervision and the Anderson Continuum of Supervision are the synthesizing core of this book which is divided into five

sections. The first section addresses organizational issues that provide the context for supervision. The second section relates to practical tools and strategies for enhancing supervision such as data collection, goal setting, conferencing and feedback. The third section addresses approaches to supervising practitioners at all levels of experience: clinical training, the working professional and speech-language pathology assistants. The fourth section focuses on training individuals to participate more effectively in supervision. This includes preparing supervisees for the process and fostering lifelong supervisor professional growth. The final section presents training vehicles for use with present and future supervisors: roleplay, simulation, and the teaching clinic.
