Authentic Learning Todd Stanley 2021-09-03 This book offers teaching strategies that allow educators to provide students with authentic learning experiences that they can apply to their lives in school—and beyond. Beginning with a justification for authentic learning and how it teaches 21st-century skills, each subsequent chapter discusses a specific strategy and how it allows for authenticity. Strategies include project-based learning, problem-based learning, inquiry-based learning, and simulations. The book also includes a section on the role of the authentic teacher in the classroom and tips for managing an authentic classroom. The book concludes with specific tactics that can be used inside and outside the classroom to bring the real world to students.

Inspiring Motivation in Children and Youth David A. Bergin 2022-09-26 Inspiring Motivation in Children and Youth: How to Nurture Environments for Learning explores motivation and its crucial role in promoting well-being in the classroom and life beyond school. It will help all those who work with children and youth to understand and improve their motivation, and to create nurturing environments for younger people.

David Bergin provides a highly accessible exploration of key research, examining the ways children's goals, self-efficacy, self-determination, and feelings of being cared for affects their motivation as well as their desire to learn more about themselves and the world. This essential guide also addresses influences of competition, diversity, prejudice, and discrimination on motivation. The book provides a comprehensive look at the importance of instilling motivation at this critical age, highlighting the benefits through real-life examples and anecdotes. Illustrated with stories from diverse contexts, the author provides practical advice on how to use goals effectively, help children feel competent, autonomous, and like they belong. Inspiring Motivation in Children and Youth is for any student looking to excel in a psychological, educational, health, or social work setting, as well as professionals in the field, and parents. It is targeted for people who work or plan to work with children from pre-school to high school and will be useful to teachers, youth leaders, coaches, counselors, social workers, and nurses.

Math Education for America? Mark Wolfmeyer 2013-12-04 Math Education for America? analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States. The effort to standardize a national mathematics curriculum for public schools in the U.S. culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics. Rather than looking at the text of specific policy documents, this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis. Breaking new ground in detailing and theorizing the politics of math education, Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments: human capital education policy, debates over traditional and reform pedagogy, the assumed content knowledge deficit of math teachers, and the proliferation of profit-driven educational businesses. By establishing the interconnectedness of these interests with the national math education curriculum, he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest.

Creating Life-Long Learners Todd Stanley 2015-07-30 Wanted for the global workforce: thinkers (and those who can teach them) Where K-12 instruction once centered on content and memorization, today's educators want, most of all, to teach their students to think critically and perceptively. What better way than with project-based learning (PBL)? Author Todd Stanley provides a teacher-friendly, step-by-step approach to implementing PBL, showing readers how to: Use project and classroom management skills to create a positive, productive learning environment Develop curriculum around ten different project types Link projects with today's standards Teach students how to effectively collaborate and bring out the best in
