Readers' Guide to Periodical Literature Anna Lorraine Guthrie 1919 An author subject index to selected general interest periodicals of reference value in libraries.

Sharing Our Intellectual Traces Tracy Bridgeford 2016-11-03 Administrators of academic professional and technical communication (PTSC) programs have long relied upon lore--stories of what works--to understand and communicate about the work of program administration. Stories are interesting, telling, engaging, and necessary. But a discipline focused primarily on stories, especially the ephemeral stories narrated at conferences and deliberated at department meetings, usually suffice primarily to solve immediate problems and address day-to-day concerns and activities. This edited collection captures some of those stories and layers them with theoretical perspectives and reflection, to enhance their usefulness to the PTSC program administration community at large. Like the ephemeral stories PTSC program administrators are accustomed to, the stories told in this volume are set within specific institutional contexts that reflect specific institutional challenges. They emphasize the intellectual traces--the debts the authors owe to those who have informed and transformed their administrative work. In so doing, this collection creates another conversation--albeit a robust, diverse, and theoretically informed one--around which program leaders might define or redefine their roles and re-envision their administrative work as the rich, complex, intellectual engagement that we find it to be. This volume asks authors to move beyond a notion of administration as an activity based solely in institutional details and processes. In so doing, they emphasize theory as they share their reflections on core administrative processes and significant moments in the histories of their associated programs, thereby affording opportunities for critical examination in conjunction with practical advice.

Undergraduate Mathematics for the Life Sciences Glenn Ledder 2013 There is a gap between the extensive mathematics background that is beneficial to biologists and the minimal mathematics background biology students acquire in their courses. The result is an undergraduate education in biology with very little quantitative content. New mathematics courses must be devised with the needs of biology students in mind. In this volume, authors from a variety of institutions address some of the problems involved in reforming mathematics curricula for biology students. The problems are sorted into three themes: Models, Processes, and Directions. It is difficult for mathematicians to generate curriculum ideas for the training of biologists so a number of the curriculum models that have been introduced at various institutions comprise the Models section. Processes deals with taking that great course and making sure it is institutionalized in both the biology department (as a requirement) and in the mathematics department (as a course that will live on even if the creator of the course is no longer on the faculty). Directions looks to the future, with each paper laying out a case for pedagogical developments that the authors would like to see.

Lone Star Politics Ken Collier 2018-11-29 "I really love this textbook. It is easy to read and flows logically. [...] as far as an "assigned reading" book for a face-to-face lecture goes, the book is top notch." —Brian Naples, Panola College In Texas, myth often clashes with the reality of everyday government. Explore the state's rich political tradition with Lone Star Politics as this local author team explains who gets what and how. Utilizing the comparative method, the authors set Texas in context with other states' constitutions, policymaking, electoral practices, and institutions as they delve into the evolution of its politics. Critical

thinking questions and unvarnished "Winners and Losers" discussions guide students toward understanding Texas government and assessing the state's political landscape. The Sixth Edition expands its coverage on civil rights in the state, as well as contemporary issues highlighting the push-pull relationship between the state and federal and local governments.
