Get Ready! For Standardized Tests : Math Grade 4 June Heller 2001-07-11 One of the areas of study students find most difficult to master--and are most fearful of--is math. Yet the core math skills acquired in the first four years of school form the basis of all future academic success. Get Ready for Standardized Tests, the first and only grade-specific test prep series, now features hands-on guidance on helping kids master the all-important basic math skills while arming parents with the tools they need to help their children succeed.

Education Redux Eli Fishman 2010-02-03 This book addresses America's social, political, economic and environmental crises, critiquing traditional remedies and K-12 education. It argues for school reform responsive to social realities and proposes using video game technology to make education relevant and engaging. The book offers an operational guide for modernizing education.

Results and Interpretations of the 2003 Mathematics Assessment of the National Assessment of Educational Progress Peter Kloosterman 2007 With the enactment of No Child Left Behind, and its sanctions for schools that fail to make adequate yearly progress, NAEP (National Assessment of Educational Progress) results are no longer afterthoughts. Instead, the results generate headlines and are at the forefront of discussion of what is working in schools and what needs to be changed. As the scrutiny of NAEP results has increased, the National Center for Education Statistics has provided more detailed reporting of the results and has increased the level of security of the assessment items. Both the level of detail and the concern for item security have played prominent roles in the development of this book. The foregoing changes make understanding NAEP and its consequences crucial for any educator. This book provides a background on NAEP, looks at 2003 mathematics achievement in different content areas, discusses data on who is teaching mathematics in the United States and examines students' perception of mathematics. Additionally, the book deals with results from NAEP broken down by race/ethnicity and by gender, analyses certain NAEP results with a focus on what is actually measured by those results and examines changes in NAEP over the years and what those changes mean for NAEP as a tool for understanding student learning.

Mathematics Curriculum in School Education Yeping Li 2013-11-19 Mathematics curriculum, which is often a focus in education reforms, has not received extensive research attention until recently. Ongoing mathematics curriculum changes in many education systems call for further research and sharing of effective curriculum policies and practices that can help lead to the improvement of school education. This book provides a unique international perspective on diverse curriculum issues and practices in different education systems, offering a comprehensive picture of various stages along curriculum transformation from the intended to the achieved, and showing how curriculum changes in various stages contribute to mathematics teaching and learning in different educational systems and cultural contexts. The book is organized to help readers learn not only from reading individual chapters, but also from reading across chapters and sections to explore broader themes, including: Identifying what is important in mathematics for teaching and learning in different education systems; Understanding mathematics curriculum and its changes that are valued over time in different education systems; Identifying and analyzing effective curriculum practices; Probing effective infrastructure for curriculum development and implementation. Mathematics Curriculum in School Education brings new insights into curriculum policies and practices to the international community of mathematics education, with 29 chapters and four section prefaces contributed by 56 scholars from 14 different education systems. This rich collection is indispensable reading for mathematics educators, researchers, curriculum developers, and graduate students interested in learning about recent curriculum development, research, and practices in different education systems. It will help readers to reflect on curriculum policies and practices in their own education systems, and also inspire them to identify and further explore new areas of curriculum research for improving mathematics teaching and learning.

Word Problems Grade 5 Robert Smith 2003-03-19 Word Problems, Grade 5 Homework Booklet will help teach math skills like fractions, money, and mixed numbers using word problems. Students will strengthen their reading skills as they learn basic math operations and critical thinking skills.

What Mathematics Do Students Know and How is that Knowledge Changing? Evidence from the National Assessment of Educational Progress Peter Kloosterman 2015-09-14 The volume provides comprehensive information on students' math abilities at grades 4, 8, and 12, based on NAEP data from 2005-2013. It highlights challenges in analyzing NAEP data, themes in math learning improvement, and the impact of wording changes on performance. It also discusses limitations of NAEP in measuring Common Core standards.
