The book is divided into five parts. Part I ... begins with a chapter on the brain and the nervous system ... the next two chapters ... cover the senses and perception ... Part II ... draws on two kinds of biological foundations--the insights gained from the study of animals ... and the role of the body in human motivation and skilled

action ... Part III conveys the stories of ... subjects studied under ... human cognition ... Part IV ... covers social influence and social perception ... Part V ... begins with the problem of how to define and measure intelligence and personality traits ... the book ends by considering the impact of emotions on the body.-
