Photoshop CS3 for Windows and Macintosh Elaine Weinmann
2007-06-22 This Visual QuickStart Guide uses a combination of task-based instruction and strong visuals to teach beginning and intermediate users how to create great-looking images with Photoshop. Best-selling authors Elaine Weinmann and Peter Lourekas take readers step by step through all of today's Photoshop essentials: from importing digital photos through basic color manipulation and image correction to painting, masking, using filters, and more. Hot topics like working with Camera Raw, using the improved Photomerge command (that aligns and blends layers automatically) to stitch together images, making selections using the new Quick Selection tool and Refine Edge feature, and Smart Filters are all covered. Both beginning users, who want a thorough introduction to the topic, and more advanced users, who are looking for a handy reference, will find what they need here. In this edition, using a fresh new design and now illustrated in full color, the authors have streamlined the text by focusing on the most efficient means of accomplishing a task, rather than explaining all possible methods. By the end of the book, users will have a solid foundation for working in Photoshop CS3. Additional intermediate topics can be found in the author's follow-on book: Photoshop CS3: Visual QuickPro Guide.

Uncrewed Vessels and International Law Haiwen Zhang 2024-07-01

This policy-oriented jurisprudence presents the latest research findings on legal challenges faced by the international regulatory framework, as posed by the increasing deployment of uncrewed vessels at sea. It is the first publication that offers discussions and opinions reflecting a combined international and comparative (especially, eastern) perspective. The contributors from multiple jurisdictions elaborate on legal implications of the use of uncrewed vessels for military, commercial, scientific-research, and law-enforcement purposes from such diverse angles as the law of the sea, international humanitarian law, the law of war, global shipping regulation, marine environment protection, cybersecurity, and artificial intelligence and law.
