An Introduction to Object-oriented Design in C++ Jo Ellen Perry 1996 Which comes first, learning object-oriented design or programming in C++? The authors present an object-oriented approach at the outset as the best way to learn introductory programming concepts. C++ doesn't have to be the top hierarchical level at the end of a programming journey. The object-oriented features of C++ are used as an appropriate foundation for learning to program.

Algorithm Design Practice for Collegiate Programming Contests and Education Yonghui Wu 2018-11-15 This book can be used as an experiment and reference book for algorithm design courses, as well as a training manual for programming contests. It contains 247 problems selected from ACM-ICPC programming contests and other programming contests. There's detailed analysis for each problem. All problems, and test datum for most of problems will be provided online. The content will follow usual algorithms syllabus, and problem-solving strategies will be introduced in analyses and solutions to problem cases. For students in computer-related majors, contestants and programmers, this book can polish their programming and problem-solving skills with familiarity of algorithms and mathematics.

The Internet Yellow Pages Harley Hahn 1996 Lists and describes Internet resources on subjects ranging from agriculture to zoology, pointing out those that are useful, bizarre, or otherwise noteworthy.

Proceedings of the 2nd International Conference on Green Communications and Networks 2012 (GCN 2012): Volume 5 Yuhang Yang 2013-02-11

The objective of the 2nd International Conference on Green Communications and Networks 2012 (GCN 2012) is to facilitate an exchange of information on best practices for the latest research advances in the area of communications, networks and intelligence applications. These mainly involve computer science and engineering, informatics, communications and control, electrical

engineering, information computing, and business intelligence and management.

Proceedings of the 2nd International Conference on Green Communications and Networks 2012 (GCN 2012) will focus on green information technology and applications, which will provide in-depth insights for engineers and scientists in academia, industry, and government. The book addresses the most innovative research developments including technical challenges, social and economic issues, and presents and discusses the authors' ideas, experiences, findings, and current projects on all aspects of advanced green information technology and applications. Yuhang Yang is a professor at the Department of Electronic Engineering, Shanghai Jiao Tong University. Maode Ma is an associate professor at the School of Electrical & Electronic Engineering, Nanyang Technological University.

Problem Solving in C++ Including Breadth and Laboratories Angela B. Shiflet 1998 In the author's words, this book introduces students "to the analysis, design, implementation, testing, and debugging of programs using C++, and to the breadth and richness of the computer science discipline." PROBLEM SOLVING IN C++ features an early but gradual and natural introduction to object-oriented programming (starting in Chapter 3), and chapter-ending, built-in laboratories that directly support the book's presentation of concepts. It offers twenty-two discrete "breadth" sections that present a broad range of topics in computer science. The author presents programming in a clear, visual manner with ample use of examples and figures. Other learning features include exercises at the end of each section, an average of 17 programming projects per chapter, historical anecdotes, chapter introductions and goals, programming and debugging hints, chapter key terms and summaries, and review questions.
