Books in Print 1991

Calculus Robert Thomas
Smith 2011-02 Students who
have used Smith/Minton's
Calculus say it was easier to
read than any other math book
they've used. That testimony
underscores the success of the
authors' approach, which
combines the best elements of
reform with the most reliable
aspects of mainstream calculus
teaching, resulting in a
motivating, challenging book.
Smith/Minton also provide
exceptional, reality-based
applications that appeal to
students' interests and
demonstrate the elegance of
math in the world around us.
New features include: * A new
organization placing all
transcendental functions early
in the book and consolidating
the introduction to L'Hôpital's
Rule in a single section. * More
concisely written explanations
in every chapter. * Many new

exercises (for a total of 7,000
throughout the book) that
require additional rigor not
found in the 2nd Edition. * New
exploratory exercises in every
section that challenge students
to synthesize key concepts to
solve intriguing projects. * New
commentaries ("Beyond
Formulas") that encourage
students to think
mathematically beyond the
procedures they learn. * New
counterpoints to the historical
notes, "Today in Mathematics,"
that stress the contemporary
dynamism of mathematical
research and applications,
connecting past contributions
to the present. * An enhanced
discussion of differential
equations and additional
applications of vector calculus.
*Grameen Social Business
Model* Rashidul Bari
2011-06-24 "Muhammad Yunus
is that rare phenomenon, wrote
Rashidul Bari, "A Nobel Peace
Prize-winning economist

famous for his two theories—microcredit and social business—and famous for his successful practical work through Grameen Bank that has already helped millions of poor women break the cycle of poverty.” Rashidul Bari, as a writer, is not new to the subjects of Yunus, microcredit, and social business. As a fellow Bangladeshi, he has written extensively in English and Bengali about Yunus in books, poems, and songs; in magazines and newspapers; and in films. In fact, Bari serves as the Bangladeshi James Boswell to Muhammad Yunus’ Samuel Johnson. Bari’s new book, *Social Business; A Manifesto for Proletariat Revolution*, is a long-awaited, fascinating, clearly and movingly written text in which he not only criticizes Prime Minister Hasina for unleashing her hate mongering to destroy Grameen Bank, but he also explains how microcredit, social business, and Grameen could be used as a weapon in the global battle against

poverty, which kills 22,000 people every day. The book is approximately 52,000 words in length with 3 photo albums. It divided into 25 chapters. These chapters explain what Bari has witnessed and learned from Yunus and GB, to emphasize the power and promise of SB. Part I: Chapter one presents observable, empirical, and measurable evidence of poverty as the biggest challenge of the 21st century. Chapter 2 uses the narrative method to describe the history of poverty. Concern about poverty has a long tradition, as according to the Bible “the poor will always be with us.” Rejecting this old notion, Yunus plans to make poverty an artifact in a museum by 2030. Chapter 3 applies the rational choice theory to the concept of social business. Chapter 4 uses the monetary poverty threshold, a concept developed by the World Bank, to measure extreme and moderate poverty, and the Gini coefficient developed by Italian mathematician Corrado Gini to measure relative poverty.

Chapter 5, with 13 subdivisions, applies correlation studies to identify the causes of poverty and to illustrate how poverty creates conditions that result in 20,000 deaths every day. Chapter 6 presents the Grameen Social Business (GSB) model. Part II: Chapters 7-12 discuss the life of Muhammad Yunus, the history of microcredit, the rise of the Grameen Bank, and the utility of the GSB model. Chapter 13 deals with the criticism of the bank. Chapters 15-16 highlight women's empowerment and sustainability, which refutes some of the criticisms in previous chapters. Part III: Chapter 17 reviews the false allegations against Yunus (e.g., Tom Heinemann's "Caught in Micro Debt") and investigates why Hasina used Heinemann's documentary as an excuse to remove Yunus from Grameen Bank. Chapter 18 focuses on the Bangladesh Bank's view of the founder of Grameen Bank. Chapter 19 examines why the world is stunned by Hasina's malevolent hate campaign

against Yunus and her attempts to take control of the Grameen Bank. Chapter 20 details the Bangladesh High Court decision to uphold the Bangladesh Bank's illegal decision, which illustrates how the High Court and the Supreme Court have become a "dog sleeping at its owner's feet." Chapter 21 uses the Court of King Solomon as an important lesson that shows that the prime minister of Bangladesh has become a monster. Chapter 23 explains why an Indian immigration officer slapped Rehman Sobhan. Chapter 24 uses "the Trial of Galileo" as an important lesson that illustrates the political vendetta by Hasina against Yunus could be understood as a modern-day replay of the famous conflict between Pope Urban VIII and Galileo Galilei. Chapter 25 documents how Yunus' removal has sparked protests around the world. It also announces a manifesto for a "Grameen Revolution." The chapter explains why the inscription on Karl Marx's

tomb can be adapted to Yunus' Grameen Bank: Poor people—especially the poor women of Bangladesh—UNITE.

Calculus Robert Thomas Smith 2011-04-01 Now in its 4th edition, Smith/Minton, Calculus offers students and instructors a mathematically sound text, robust exercise sets and elegant presentation of calculus concepts. When packaged with ALEKS Prep for Calculus, the most effective remediation tool on the market, Smith/Minton offers a complete package to ensure students success in calculus. The new edition has been updated with a reorganization of the exercise sets, making the range of exercises more transparent. Additionally, over 1,000 new classic calculus problems were added.

The Calculus Collection Caren L. Diefenderfer 2010-12-31 The Calculus Collection is a useful resource for everyone who teaches calculus, in high school or in a 2- or 4-year college or university. It consists of 123 articles, selected by a panel of six veteran high school

teachers, each of which was originally published in Math Horizons, MAA Focus, The American Mathematical Monthly, The College Mathematics Journal, or Mathematics Magazine. The articles focus on engaging students who are meeting the core ideas of calculus for the first time. The Calculus Collection is filled with insights, alternate explanations of difficult ideas, and suggestions for how to take a standard problem and open it up to the rich mathematical explorations available when you encourage students to dig a little deeper. Some of the articles reflect an enthusiasm for bringing calculators and computers into the classroom, while others consciously address themes from the calculus reform movement. But most of the articles are simply interesting and timeless explorations of the mathematics encountered in a first course in calculus.
