EDGAR Filer Handbook Charles H. Rider 2001 Due to renovations to EDGAR, the new fifth edition of EDGAR Filer Handbook is more essential than ever. All procedures to assemble, validate and transmit filings to EDGAR are entirely new as the DOS-based EDGARLink is replaced by the new EDGAR Filing web site. Prepared by experts with an intimate working knowledge of the EDGARLink system, the Handbook helps you stay current with the latest SEC electronic reporting procedures. It explains step-by-step how to prepare and submit documents for electronic filing precisely and efficiently. Updated to incorporate all the new and revised procedures through EDGAR and EDGARLink Release 7.0.f, you get hands-on assistance to help you make sense of new EDGARLink screen-display formats used to locate files; follow new procedures for assembly of modules and segments when mating a submission file; file financial data schedules according to new year-to-year reporting requirements; understand enhancements to the dialing script used when accessing EDGAR through EDGARLink; and much more. More than 120 sample screens illustrate EDGARLink documents, formats, tags, and messages, and easy-to-follow tables identify mandatory and optional tags used with each document.

Grant writing for medical and healthcare professionals Subhash Chandra Parija 2023-01-11

Conducting research requires resources to meet the research need. The resources in the research institutes/ centers are often inadequate, limiting the research outcome. Research grants help overcome those limitations and help the researchers carry out quality research without any restriction. Grant proposal writing is an essential skill to be mastered by every researcher. However, the majority of the medical schools, except the few research institutes, do not have a structured learning module for obtaining grants. On most occasions, the skill of writing grant proposals goes by self-learning. For students, it is burdening due to the tremendous time consumed to learn the craft of writing the grant proposal and the exhausting clinical and academic work. This book is carefully prepared to keep in mind the difficulties faced by the young researchers and the students concerning choosing a funding agency, grant makers' expectations, budgeting, surveillance and site visits, rights of the researcher and the funding agency, and ethical and legal aspects of obtaining the grant. The book also covers the alternate plan for partial funding or interruption of the financing, reporting the source of funding and acknowledgment, good clinical practice guidelines, and dealing with the rejected grant proposal. The research projects are often dropped or modified extensively due to the limited resources in the existing facility. The researchers are forced to compromise the research objective due to expensive requirements. There is a shortage of awareness regarding the availability of funding and grant for the conduct of research. Even if the researchers are aware of obtaining the financing, there is a lack of training in grant proposal writing, which is essential in getting the research funding. This book on grant proposal writing for medical and healthcare professionals covers such difficulties and deficiencies. It will provide complete companionship from knowing the funding agency to obtaining the grant.
