Interdisciplinary Studies in Pragmatics, Culture and Society Alessandro Capone 2015-07-31 This volume is part of the series 'Pragmatics, Philosophy and Psychology', edited for Springer by Alessandro Capone. It is intended for an audience of undergraduate and graduate students, as well as postgraduate and advanced researchers. This volume focuses on societal pragmatics. One of the main concerns of societal pragmatics is the world of language users. We are interested in the investigation of linguistic practices in the context of societal practices ('praxis', to use a term used in the Wittgensteinian and other traditions). It is clear that the world of users, including their practices, their culture, and their social aims has to be taken into account and seriously investigated when we deal with the pragmatics of language. It is not enough to discuss principles of language use solely in the guise of abstract theoretical tools. Consequently, the present volume focuses explicitly on the interplay of abstract, theoretical principles and the necessities imposed by societal contexts often requiring a more flexible use of such theoretical tools. The volume includes articles on pragmatics, politeness and anti-politeness, dialogue, joint utterances, discourse markers, pragmatics and the law, institutional discourse, critical discourse analysis, pragmatics and culture, cultural scripts, argumentation theory, connectives and argumentation, language games and psychotherapy, slurs, the analysis of funerary rites, as well as an authoritative chapter by Jacob L. Mey on societal pragmatics.

Pragmatics & Language Learning, Volume 11 Kathleen Bardovi-Harlig 2006 "This volume features cutting-edge research on L2 pragmatics from a wide range of theoretical and methodological approaches. It offers fresh perspectives on standard topics such as the use and learning of speech acts and the pragmatic meanings of linguistic resources, and the effect of planned intervention on pragmatic development in language instruction. The chapters also document researchers' increasing attention to different forms of computer-mediated communication as environments for using and developing L2 pragmatic competence, and of conversation analysis as an approach to different aspects of interaction in a variety of settings."-- Publisher's website (nflrc.hawaii.edu/).

Correspondences and Contrasts in Foreign Language Pedagogy and Translation Studies Katarzyna Piątkowska 2013-05-24 The book constitutes a selection of 18 papers on foreign language pedagogy (11 papers) and translation studies (9 papers). The first part of the book is devoted to foreign language pedagogy. The articles in this part focus on issues such as English as lingua franca, foreign language teacher training, the role of individual learner differences in language learning and teaching especially with respect to strategies of language learning as well as psychological and socioaffective factors. The part focusing on translation studies comprises articles devoted to a variety of topics. It places a wide range of readings within the context of varying translation domains such as translation competence, literary translation, translation strategies, translation teaching (including strategies of dictionary use) and translator training. The combination of the above aspects intends to underline the truly interdisciplinary nature of translation.

Second Language Use Online and its Integration in Formal Language Learning Andrew D. Moffat 2022-07-06 This book explores the relationship between online second language (L2) communicative activities and formal language learning. It provides empirical evidence of the scale of L2 English use online, investigating the forms most commonly used, the activities likely to cause discomfort and the challenges experienced by users, and takes a critical approach to the nature of language online beyond the paradigms of 'written' versus 'spoken'. The author explores the possibilities for language teaching practices that engage with and integrate learners' L2 English online use, not only to support it but to use it as input for classroom learning and to enhance and exploit its incidental learning outcomes. This book will be of

interest to postgraduate students and researchers interested in computer-mediated communication, online discourse and Activity Theory, while language teachers will find the practical ideas for lesson content invaluable as they strive to create a successful language learning community.

Positioning English for Specific Purposes in an English Language Teaching Context Nadežda Stojković 2018-07-05 With the unrelenting spread of globalization, the English language has been firmly established as the Lingua Franca. Now more than ever, the importance of learning English is paramount within nearly all professional and educational sectors. English for Specific Purposes (ESP) has long been accepted as an effective method for teaching English as a foreign language. In recent years, it has experienced an increasing presence in secondary and tertiary education across the globe. This is predominantly due to its learner-centered approach that focuses on developing linguistic competence in the student's specific discipline, may that be academics, business or tourism, for example. Positioning English for Specific Purposes in an English Language Teaching Context attempts to present and define the relevance and scope of ESP within English Language teaching. From mobile phones as educational tools to the language needs of medical students, the contributors to this volume examine and propose different epistemological and methodological aspects of ESP teaching. Its unique approach to ESP marks this volume out as an important and necessary contribution to existing ESP literature, and one that will be of use to both researchers and practitioners of ESP.
