*The Rise of Africa's Middle Class* Henning Melber 2016-12-15 Across Africa, a burgeoning middle class has become the poster child for the 'Africa rising' narrative. Ambitious, aspirational and increasingly affluent, this group is said to embody the values and hopes of the new Africa, with international bodies ranging from the United Nations Development Programme to the World Bank regarding them as important agents of both economic development and democratic change. This narrative, however, obscures the complex and often ambiguous role that this group actually plays in African societies. Bringing together economists, political scientists, anthropologists and development experts, and spanning a variety of case studies from across the continent, this collection provides a much-needed corrective to the received wisdom within development circles, and provides a fresh perspective on social transformations in contemporary Africa.

International Migration Outlook 2016 OECD 2016 The 2016 edition of the International Migration Outlook analyses recent developments in migration movements and policies in OECD countries and selected non-OECD countries, and looks at the evolution of the labour market outcomes of recent immigrants in OECD countries. The report includes two special chapters: "The economic impact of migration: Why the local level matters" and "International migration following environmental and geopolitical shocks: How can OECD countries respond?", as well as country notes and a statistical annex.

**Algebra and Trigonometry** Cynthia Y. Young 2017-11-20 Cynthia Young's Algebra & Trigonometry, Fourth Edition will allow students to take the guesswork out of studying by providing them with a clear roadmap: what to do, how to do it, and whether they did it right,

while seamlessly integrating to Young's learning content. Algebra & Trigonometry, Fourth Edition is written in a clear, single voice that speaks to students and mirrors how instructors communicate in lecture. Young's hallmark pedagogy enables students to become independent, successful learners. Varied exercise types and modeling projects keep the learning fresh and motivating. Algebra & Trigonometry 4e continues Young's tradition of fostering a love for succeeding in mathematics.

**System Level ESD Co-Design** Charvaka Duvvury 2017-05-05 An effective and cost efficient protection of electronic system against ESD stress pulses specified by IEC 61000-4-2 is paramount for any system design. This pioneering book presents the collective knowledge of system designers and system testing experts and state-of-the-art techniques for achieving efficient system-level ESD protection, with minimum impact on the system performance. All categories of system failures ranging from 'hard' to 'soft' types are considered to review simulation and tool applications that can be used. The principal focus of System Level ESD Co-Design is defining and establishing the importance of co-design efforts from both IC supplier and system builder perspectives. ESD designers often face challenges in meeting customers' system-level ESD requirements and, therefore, a clear understanding of the techniques presented here will facilitate effective simulation approaches leading to better solutions without compromising system performance. With contributions from Robert Ashton, Jeffrey Dunnihoo, Micheal Hopkins, Pratik Maheshwari, David Pomerence, Wolfgang Reinprecht, and Matti Usumaki, readers benefit from hands-on experience and in-depth knowledge in topics ranging from ESD design and the physics of system ESD phenomena to tools and techniques to address soft failures and strategies to design ESD-robust systems that include mobile and automotive applications. The first dedicated resource to system-level ESD co-design, this is an essential reference for industry ESD designers, system builders, IC suppliers

and customers and also Original Equipment Manufacturers (OEMs). Key features: Clarifies the concept of system level ESD protection. Introduces a co-design approach for ESD robust systems. Details soft and hard ESD fail mechanisms. Detailed protection strategies for both mobile and automotive applications. Explains simulation tools and methodology for system level ESD co-design and overviews available test methods and standards. Highlights economic benefits of system ESD co-design.

*Precalculus* Cynthia Y. Young 2018-05-14

Precalculus was developed to create a program that seamlessly align with how teachers teach and fully supports student learning. Cynthia Young's goal was to create an intuitive, supportive product for students without sacrificing the rigor needed for true conceptual understanding and preparation for Calculus. Precalculus helps bridge the gap between in-class work and homework by mirroring the instructor voice outside the classroom through pedagogical features.

**The Least Developed Countries Report 2018**

United Nations 2019-01-31 For Least Developed Countries (LDCs) to progress towards the Sustainable Development Goals, they need to transform the structure of their economy. This, in turn, requires entrepreneurship that innovates. The entrepreneurial landscape in LDCs is dominated by micro and small enterprises with low chances of survival and growth, and scant innovation. While LDCs are part of global value chains, these provide only limited opportunities of entrepreneurship development and upgrading. Most LDCs policies and programmes for entrepreneurship aim at job creation, poverty reduction and women and youth empowerment. For entrepreneurship to be a driving force towards structural transformation, policies need to target and support high-potential firms.

The Importance of Place: Geographical Indications as a Tool for Local and Regional Development William van Caenegem 2017-03-27  
This book explores the potential benefits and

disadvantages of geographical indication (GIs) registration schemes, analyzing the utility of GI registrations for the development and promotion of regional economies, both in national and international markets. The book draws on the van Caenegem, Cleary & Drahos Australian Provenance Report, along with the valuable empirical data collected in connection with it. The book situates the rural development question in an international context, presenting several case studies from Italy, France and Morocco, New Zealand and Australia. The book contains various chapters focused on comparing regulatory structures in various relevant jurisdictions and drawing on other countries' experiences. It contains significant contributions from industry actors with extensive experience in regional branding initiatives and GI-related policy issues. Progressive in structure, the book starts from the 'big picture' level before moving down to the local and concrete scale.

Geographical indications of Australian products are vital both in domestic and overseas markets by accurately representing the origin and quality of niche agricultural products. Thus, with a particular focus on Australia, the book promotes the assessment of geographical indications as potential regional assets that will help producers develop local quality indicators that will serve as public goods for successive generations of producers.

### **Global Assessment Report on Disaster Risk**

**Reduction** United Nations. International Strategy for Disaster Reduction. Secretariat 2015 A comprehensive review and analysis of the natural hazards menacing humanity. It also provides new and arresting evidence on how, where and why disaster risk is increasing globally. Drawing on detailed studies, this Global Assessment urges a radical shift in development practices, and a major new emphasis on resilience and disaster planning.

How to Pool Risks Across Generations Michael Otsuka 2023-05-28 How to Pool Risks across Generations makes the case for the collective provision of pensions, on fair terms of social cooperation. Through the insurance of a mutual association which extends across society and over multiple generations, we share one another's fates by pooling risks across both space and time. Resources are transferred, not simply between different people, but also within the possible future lives of each person: from one's more fortunate to one's less fortunate future selves. The book opens with an investigation of the longevity and investment risk that even a single individual on a desert island would face in providing for her old age. From this atomistic starting point, it builds up, within and across the chapters, to increasingly collective forms of pension provision. By joining together, it is possible to tame the risks we would face as individuals each with our own private pension pot. A collective pension can be justified as a 'social union of social unions': an enduring corporate body, which is formed by agreements to pool risks, in a manner that involves reciprocity between the various individuals that constitute the collective. Even though all individuals age and die, a collective pension scheme remains evergreen, as the average age of members remains relatively unchanged, through the influx of new members to replace those who retire. It is therefore

possible to smooth risks indefinitely across as well as within generations, to the mutual advantage of each.
