"...Recorded two decades after the close of the Civil War ... of value as firsthand accounts of events, viewed from the central spot in the nation, in a crowded year of American history. They also constitute an informed appraisal of Lincoln by an observer from within the White House who worked as a member of the President's secretarial staff. Neill was on duty there more than a year, up to the tragic scenes of April 14 and 15, 1865, - and thereafter he continued in service under President Andrew Johnson." - introduction.

**Nondestructive Testing and Evaluation of Fiber-Reinforced**

**Composite Structures** Shuncong Zhong 2022-04-01 This book presents a detailed description of the most common nondestructive testing(NDT) techniques used for the testing and evaluation fiber-reinforced composite structures, during manufacturing and/or in service stages. In order to facilitate the understanding and the utility of the different NDT techniques presented, the book first provides some information regarding the defects and material degradation mechanisms observed in fiber-reinforced composite structures as well as their general description and most probable causes. It is written based on the extensive scientific research and engineering backgrounds of the authors in the NDT and structural health monitoring (SHM) of structural systems from various areas including electrical, mechanical, materials, civil and biomedical engineering. Pursuing a rigorous approach, the book establishes a fundamental framework for the NDT of fiber-reinforced composite structures, while emphasizing on the importance of technique's spatial resolution, integrated systems analysis and the significance of the influence stemming from the applicability of the NDT and the physical parameters of the test structures in the selection and utilization of adequate NDT techniques. The book is intended for students who are interested in the NDT of fiber-reinforced composite structures, researchers investigating the applicability of different NDT techniques to the inspections of structural systems, and NDT researchers and engineers working on the optimization of NDT systems for specific applications involving the use of fiber-reinforced composite structures.
