My Life at the Mitch: A Little League Baseball Story

Matthew Cisco 2009-07-01 A true field of dreams, legendary Mitch Stadium is where Matthew Cisco spent a decade coaching the youth of Ceredo and Kenova, West Virginia about the game of baseball. Along the way, he's created lifelong friendships and coached some pretty colorful characters, while maintaining

his family's traditions--all documented in "My Life at The Mitch: A Little League Baseball Story." "This is a tribute to my family," Cisco says. "I wanted them to be aware of what a special time in my life this was. I also wanted to pass a story along to others so they could enjoy the experiences I've had as well as the importance of family and community."

relevant history of interest from one of the world's leading financial writers, *The Price of Time* explains our current global financial position and how we got here. In the beginning was the loan, and the loan carried interest. For at least five millennia people have been borrowing and lending at interest. The practice wasn't always popular—in the ancient world, usury was generally viewed as exploitative, a potential path to debt bondage and slavery. Yet as capitalism became established from the late Middle Ages onwards, denunciations of interest were tempered because interest was a necessary reward for lenders to part with their capital. And interest performs many other vital functions: it encourages people to save; enables them to place a value on precious assets, such as houses and all manner of financial securities; and allows us to price risk. All economic and financial activities take place across time. Interest is often described as the “price of money,” but it is better called

the “price of time:” time is scarce, time has value, interest is the time value of money. Over the first two decades of the twenty-first century, interest rates have sunk lower than ever before. Easy money after the global financial crisis in 2007/2008 has produced several ill effects, including the appearance of multiple asset price bubbles, a reduction in productivity growth, discouraging savings and exacerbating inequality, and forcing yield starved investors to take on excessive risk. The financial world now finds itself caught between a rock and a hard place, and Edward Chancellor is here to tell us why. In this enriching volume, Chancellor explores the history of interest and its essential function in determining how capital is allocated and priced.
