Understanding Nursing Research Carol Leslie Macnee 2008 This textbook explicitly links understanding of nursing research with evidence-based practice, and focuses on how to read, critique, and utilize research reports. Organized around questions students have when reading reports—how the conclusions were reached, what types of patients the conclusions apply to, how the study was done, and why it was done that way—the text explains the steps of the research process to answer these questions. Chapters include clinical vignettes, highlighted key concepts, and out-of-class exercises. Appendices present a variety of research examples. This edition includes significant new material on evidence-based practice and more distinction between qualitative and quantitative research.
