Modern Marine Engineer's Manual Everett C. Hunt 1999 This book is designed to serve as a textbook for students and a reference for today's engineering officers, port engineers, superintendent engineers, and other maritime professionals. Steam turbine propulsion systems are included, but the coverage has been reduced in recognition of the popularity of main propulsion diesel engines, covered in volume 2, and the anticipated increasing applications of aeroderivative gas turbines. Reciprocating steam engines have been eliminated. Pumps, pumping systems, and heat exchangers are given extensive coverage. Computer applications for machinery and system management are presented, including an entire chapter on maintenance management. Relevant material on international and national laws, classification society requirements, and standards, such as ISO 9000 series and the ISM code, are included in the text. The characteristics of fuels are presented along with a discussion of fuel testing and analysis, and a section on bunkering. A chapter on safety and management discusses shipboard engineering operations, shipyard repair planning and economics, and safety management. Each chapter includes review questions and references for additional study.

Hydrocarbon Processing 2007 September 1, 2021-: "Since 1922, management and technical professionals from petroleum refining, gas processing, petrochemical/chemical and engineer/constructor companies throughout the world have turned to Hydrocarbon Processing for high quality technical and operating information. Bone Marrow Processing and Purging Adrian P. Gee 2020-11-25 Bone Marrow Processing and Purging: A Practical Guide provides an up-to-date practical guide to the major ex vivo procedures associated with bone marrow transplantation. Previously, this information was communicated primarily by word of mouth; now experts in the field present detailed descriptions and evaluations of methods for marrow harvesting, evaluation (including tumor infiltration, flow cytometric analysis, and colony assays), comparative methods for automated nucleated cell separation and enumeration, tumor cell purging, T cell depletion, stem cell selection, gene transfer, and cytopreservation. Special sections address quality control and FDA regulations. The book provides a unique information source intended for clinicians, researchers, technical staff, transplant nurses, and medical students involved in this rapidly expanding area of medicine.
