Teaching Digital Storytelling Sheila Marie Aird 2024-03-18 Everyone has a story to tell, and this book will inspire and guide readers to teach and learn through the production of digital narratives. This book presents the stories of educators who through digital storytelling inspire students from diverse communities to construct their empowering digital narratives. Educators from a wide range of disciplines present innovative case studies of teaching digital storytelling through the lens of personal narratives, metaliteracy, and information literacy. They describe how teaching students to tell their personal digital stories prepares them as learners who are reflective while playing

active learner roles such as producer, publisher, and collaborator. As an innovative resource for teaching and learning with digital media, this book: Combines the theory and practice of digital storytelling with metaliteracy and the ACRL Framework for Information Literacy for Higher Education Explores how to inspire learners to share their original digital narratives Offers the opportunity to explore and address issues of race, class, and gender to give voice to these issues as part of the storytelling process Investigates the role of diversity, equity, and inclusion in writing and producing original digital narratives Examines novel approaches to collaborative digital storytelling and peer review Presents pioneering models for global digital storytelling among international learners online Describes empowering digital narratives

constructed by students who found and shared their voices through this creative processProvides inventive models for teaching effective planning through well-written scripts and visual storyboardsOffers openly-available resources such as rubrics, assignment descriptions, and digital technologiesShowcases the application of metaliteracy OER in digital storytelling learning activities and coursesThrough this book, faculty, librarians, school library media specialists, and instructional designers will learn how to teach the theory and practice of digital storytelling. This innovative resource will also empower students to reflect on their roles as digital storytellers and metaliterate learners in today's dynamic and evolving information environment.

The Concept of Empire in Western Europe from the Fifth to the Fourteenth Century

Robert Folz 1969 In the Middle Ages nothing that happened was ever regarded as absolutely new; each development was seen as a renewal of a former state of things. By studying the concept of empire during that period, one can understand how it caused political structures to be formed which claimed to be a continuation of the Empire of Rome.

Let's Create Writers Timothy Horan 2021-10-21

In this book, Dr. Timothy Horan presents an original and highly effective writing program whose major goal is to transform middle school students into competent and confident writers. This writing program is innovative, rigorous, and

engaging, and was designed with the student in mind. This book contains a total of twenty original writing assignments—ten for seventh grade, and another ten for eighth grade. These assignments are based on middle school students' natural predilections and developmental levels, and represent creative interpretations of the Common Core Writing Standards. Each writing project in this book is full and complete, and is described with clarity and simplicity. Each assignment also includes a reproducible outline that presents the assignment to students in a simplified graphical format. The pedagogical philosophy underlying this program is simple and effective. It seeks to provide students with enjoyable writing assignments that students will understand, learn from, and complete. As students progress through the program, they will develop an upbeat emotional bond with the act of writing, and will learn to approach composition with a sense of optimism and confidence.

Writing and Growing Timothy Horan
2022-07-11 In this book, Dr. Timothy Horan
presents an original and highly effective writing
program whose major goal is to transform high
school students into accomplished writers and
mature young adults. This writing program is
innovative, rigorous, and engaging, and was

designed with high school students in mind. This
volume contains a total of twenty original
writing projects that represent creative (and
innovative) interpretations of Common Core
Writing Standards. These projects focus on the
worlds of contemporary secondary students,
exploring such topics as technology, literature,
goals for the future, and potential careers. Each
assignment in this book is full and complete, and
includes a reproducible outline that presents the
assignment to students in a simplified graphical
format. As students progress through this
program, they will encounter engaging writing
projects that foster growth and anticipate the
changes occurring in students' lives during this
time of development and transition. It will also
prepare students for the rigors of writing in
college, career, and the unwritten future that
awaits all of them. Finally, Dr. Horan issues a
call for every secondary school in the United
States to create and implement courses
singularly devoted to the craft of writing—and
