Informal STEM Learning at Home and in Community Spaces Bradley Morris 2024-03-22
Children in Western countries spend only about 20% of their waking time in school (Meltzoff et al., 2009). Leveraging the 80% of time that they spend outside of school can provide children with opportunities to engage in meaningful, authentic STEM learning experiences with family members, other caregivers, and children. STEM learning and readiness go beyond acquiring content knowledge to include interest, engagement, and motivation for STEM learning as well as the formation of a STEM identity. To date, there has been a dearth of research focusing on children's informal STEM experiences when compared to formal, school-based STEM learning experiences. This

Research Topic focuses attention on the authentic, everyday experiences of children and how these experiences provide opportunities for STEM learning, engagement, and identity. In addition, these papers will explore how these everyday experiences can be leveraged and augmented to promote STEM learning and engagement through culturally-relevant design and implementation.

A Leadership Playbook for Addressing Rapid Change in Education Teresa L. San Martin

2023-03-17 A Leadership Playbook for Addressing Rapid Change in Education provides educational leaders with a simple, step-by-step approach for addressing rapid change. Drawing on the model of appreciative inquiry, this book provides detailed examples of educational problems and provides the who, what, where, when, why, and how to achieve change. Author Teresa L. San Martín emphasizes the traits of

outstanding and exceptional leaders: trust; collaborative efforts; communicating with empathy and care. Detailed play-by-play examples are provided that show how school administrators are able to solve relevant problems of practice such as how to create productive and focused high school teacher teams, how educational leaders can increase teacher retention, and how district administrators can provide innovative and meaningful staff development opportunities. This timely book—which supports educators as they continue to grapple with the effects of the pandemic—provides real solutions, equipping school administrators with the tools necessary to confront perpetual change occurring in today’s complex educational environment.

the K-12 special education methods course for future teachers of students with learning problems. Knowing that no one approach to teaching is right for all children all of the time, this comprehensive, yet accessible, case-based text presents current best practices, with the aim of helping prospective teachers learn to tailor instruction to the diverse needs and abilities of students with learning problems. The authors explore the entire inclusion movement and the theories of teaching and learning that inform it; discuss the nature of students with learning problems and the characteristics of effective teachers; and, describe a broad spectrum of proven instructional strategies for all curriculum areas. Finally, they examine the unique challenges and opportunities that transitions create for students with learning problems.

Psychology in Learning and Instruction

Patricia A. Alexander 2006 This book introduces future educators and researchers to several different psychological perspectives and uses these perspectives to introduce key issues such as knowledge acquisition and transfer, strategic process, and student motivation. As an editor and reviewer of the top journals in the field, the author is able to present the latest research in language that is accessible and understandable. Unlike other books that are organized around theoretical topics valued by psychologists, it is organized around education problems and issues deemed important by educators.

The Art of Teaching Science Jack Hassard 2005 This is a core teaching textbook designed for the professional development of middle and high

school science teachers. Differing from other texts in its constructivist approach to learning and teaching, it provides meaningful learning experiences and connections with the most recent research and understanding of science teaching. Each chapter is organized into two sections : the first focuses on the content of the major theme of the chapter, while the second consists of a newspaper-like feature called The Science Teaching Gazette, containing a variety of strategies for extending the learning process. Packed with learning tools, hands-on inquiry activities, case studies, think pieces, and interviews with teachers around the world, this is a remarkably comprehensive textbook designed to prepare a new cadre of science teachers.
