Practical Steps to Digital Research Deborah B. Stanley 2018-07-11 This hands-on approach to teaching digital research skills breaks down each research skill into simple, targeted steps that enable students to research more deeply and to accomplish real-world tasks. Today's rapidly diversifying digital world provides easy access to information, making it increasingly important that students know how to conduct research online. In this book, you'll learn how to transition your instruction of the research process from a print context to a digital one, and to expand your own knowledge of how to best assist students at all stages of their research. Using six well-defined steps that she developed in her 26 years of experience as a school

librarian, Deb Stanley provides practical strategies for each of the six steps of the research process accompanied by easily used and replicated lessons and handouts that are applicable and adaptable to all grade levels K-12. Step-by-step instruction, links to Common Core state standards, and ideas to help students succeed at each stage of the research process makes this title a must-have for any school librarian.

The Schenley Experiment Jake Oresick 2017-04-14 The Schenley Experiment is the

story of Pittsburgh's first public high school, a social incubator in a largely segregated city that was highly—even improbably—successful throughout its 156-year existence. Established in 1855 as Central High School and reorganized in 1916, Schenley High School was a model of innovative public education and an ongoing experiment in diversity. Its graduates include Andy Warhol, actor Bill Nunn, and jazz virtuoso Earl Hines, and its prestigious academic program (and pensions) lured such teachers as future Pulitzer Prize winner Willa Cather. The subject of investment as well as destructive neglect, the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt. Integrated decades before *Brown v. Board of Education*, Schenley succumbed to default segregation during the “white flight” of the 1970s; it rose again to prominence in the late 1980s, when parents camped out in six-day-long

lines to enroll their children in visionary superintendent Richard C. Wallace's reinvigorated school. Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh, officials closed the school in 2008, citing over \$50 million in necessary renovations—a controversial event that captured national attention. Schenley alumnus Jake Oresick tells this story through interviews, historical documents, and hundreds of first-person accounts drawn from a community indelibly tied to the school. A memorable, important work of local and educational history, his book is a case study of desegregation, magnet education, and the changing nature and legacies of America's oldest public schools.

Basel IV Martin Neisen 2018-07-26 In December 2017 the Basel committee finalised its work on the reform of the Basel III framework. Together with requirements already published in 2015 and 2016, the Basel committee changes all approaches for the calculation of RWA and the corresponding Pillar III disclosure rules. This package of new standards from the Basel Committee, which is unofficially called "Basel IV", is now the most comprehensive package of modifications in the history of banking supervision. The banking industry will face major challenges in implementing these new rules. The second edition of the "Basel IV" handbook is updated with all publications up to March 2018 and also extensively enhanced with additional details, examples and case studies.

The aim is to convince the reader that we are facing a new framework called "Basel IV" and not just a fine adjustment of the existing Basel III regulations. This book covers all new approaches for the calculation of RWA: - the standardised approach (CR-SA) and the IRB approach for credit risk, - the new standardised approach for counterparty credit risk (SA-CCR), - both the standardised approach and internal models approach from the "fundamental review of the trading book" (SBA and IMA) - the basic approach (BA-CVA) and standardised approach (SA-CVA) for the CVA risk, - all new approaches (SEC-IRBA, SEC-ERBA, SEC-SA, IAA) for securitisations (incl. STS), - the approaches for the calculation of RWA for equity positions in investment funds (LTA, MBA, FBA) - the new standardised approach for operational risk (SA-OpRisk) Because of the strong relation to the Pillar I requirements, the second edition covers the topics of interest rate risk in the banking book (IRRBB), large exposures and TLAC again.

Additionally, the book contains a detailed description of the Pillar III disclosure requirements. With the aid of a high-profile team of experts from countries all over the globe, the complexity of the topic is reduced, and important support is offered.

Policy-Making in the GCC Neil Quilliam
2017-09-11 The GCC is a major player in the post-2011 reordering of the Middle East. Despite the rise in prominence of individual Gulf states - especially Kuwait, Qatar, Saudi Arabia and the United Arab Emirates - and the growth of the GCC as a collective entity, surprisingly little attention has been paid to the actual mechanics of policy-making in the region. This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states. The research coincides with two key developments that have given institutions new importance in the policy process: the emergence of a new generation of leaders in the Gulf, and

the era of low oil prices. Both developments, along with dramatic demographic change, have compelled state and citizens to re-evaluate the nature of the social contract that binds them together. Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy. The book shows how academic, social and economic institutions are responding to the increasingly complex process of decision-making, where citizens demand better services and further empowerment, and states are obliged to seek wider counsel, although wanting to retain ultimate authority. With contributions from both academics and practitioners, this book will be highly relevant for researchers and policymakers alike.

The Bloomsbury Handbook of Rural

Education in the United States Amy Price

Azano 2021-09-09 This handbook begins with a foundational overview of rural education, examining the ways in which definitions, histories, policies, and demographic changes influence rural schools. This foundational approach includes how corporatization, population changes, poverty, and the role of data affect everyday learning in rural schools. In following sections, the contributors consider how school closures, charter schools, and district governance influence decision making in rural schooling, while also examining the influence of these structures on higher education attainment, rural school partnerships, and school leadership. They explore curriculum studies in rural education, including place-based and trauma-informed pedagogies, rural

literacies, rural stereotype threat, and achievement. Finally, they engage with issues of identity and equity in rural schools by providing an overview of the literature related to diverse populations in rural places, including Indigenous, Black, and Latinx communities, and exceptional learners. Importantly, this handbook applies theoretical tools to rural classroom experiences, demonstrating the potential of work centered at the intersection of theory, rurality, and classroom practice. Each section concludes with a response by an international scholar, situating the topics covered within the broader global context.
