The Report: Ghana 2019 Oliver Cornock First to independence from colonial rule, Ghana continues to be one of the most stable countries in sub-Saharan Africa. A nation of great diversity in landscapes, languages and ethnicities, Ghana has seen a steady improvement in its people's well-being over the years. The country is nowadays one of Africa's fastest-growing economies and is trying to move away from traditional resource dependency. However, it faces the challenge of ensuring the widest benefit from that expansion, particularly given its growing and increasingly urbanised population.

Middle Powers and International Organisations Aynsley Kellow 2017-05-26 This book provides a unique examination of how a middle power uses international organisations to achieve greater global influence. The authors focus on the OECD, 'the rich man's club' of most of the world's wealthiest nations. It demonstrates how the decision by Australia to apply for membership was a long drawn out process, delayed by political factors. Eventually agreement was reached with assurances that membership would provide access to valuable and timely policy-related information, especially in relation to international trade and finance. In addition, membership would potentially increase influence by providing greater access to its powerful member states at an earlier stage in their policy discussions and agreements.

Too Close to Ignore Mark Moran 2020-03-31 Less than five kilometres from Australia's most northern islands in the Torres Strait lies the southern coast of Papua New Guinea (PNG). The people living on the PNG side of the border along the South Fly coast live in abject poverty, with a near total absence of services and infrastructure. The disparity in income, housing and health outcomes when compared with their nearby neighbours and relatives in the Torres Strait Islands, is extreme. The border is the focus of a range of interventions by the Australian and Queensland governments, including border protection, quarantine, marine resource management, and infectious disease control, including an alarming outbreak of multi-drug resistant tuberculosis. Restrictions are increasing on trading, fishing and access to Australian services. However, questions remain as to whether this focus is having unintended consequences, increasing the destitution and frustration on the PNG side, in turn exacerbating the security threat to Australia. And as the Australian border hardens, the Indonesian border beckons. This book presents the results of three years of research into the unique social and political geography of the borderland. The Torres Strait Treaty between Australia and PNG serves to construct a complex institutional layering, a tiered economy and a hierarchy of identities between those South Fly villagers who have rights under the Treaty to travel into Australia, and those who do not. This creates a politics of expectation and frustration that permeates everyday life along the South Fly coast, through which development projects must navigate.

Written in a clear and relatable style for

students, *We Stay the Same* combines ethnographic and ecological research to show how the people of New Hanover, Papua New Guinea, continue to survive and make meaningful lives in a situation where their own hopes for economic development via logging and commercial agriculture have often been used against them as a mechanism of a more distantly profitable dispossession.

War at the Margins Lin Poyer 2022-12-31 *War at the Margins* offers a broad comparative view of the impact of World War II on Indigenous societies. Using historical and ethnographic sources, Lin Poyer examines how Indigenous communities emerged from the trauma of the wartime era with social forms and cultural ideas that laid the foundations for their twenty-first-century emergence as players on the world's political stage. With a focus on Indigenous voices and agency, a global overview reveals the enormous range of wartime activities and impacts on these groups, connecting this work with comparative history, Indigenous studies, and anthropology. The distinctiveness of Indigenous peoples offers a valuable perspective on World War II, as those on the margins of Allied and Axis empires and nation-states were drawn in as soldiers, scouts, guides, laborers, and victims. Questions of loyalty and citizenship shaped Indigenous combat roles—from integration in national armies to service in separate ethnic units to unofficial use of their special skills, where local knowledge tilted the balance in military outcomes. Front lines crossed Indigenous territory most consequentially in northern Europe, Southeast Asia, and the Pacific Islands, but the impacts of war go well beyond combat. Like others around the world, Indigenous civilian men and women suffered bombing and invasion, displacement, forced labor, military occupation, and economic and social disruption. Infrastructure construction and demand for key resources affected even

areas far from front lines. World War II dissolved empires and laid the foundation for the postcolonial world. Indigenous people in newly independent nations struggled for autonomy, while other veterans returned to home fronts still steeped in racism. National governments saw military service as evidence that Indigenous peoples wished to assimilate, but wartime experiences confirmed many communities' commitment to their home cultures and opened new avenues for activism. By century's end, Indigenous Rights became an international political force, offering alternative visions of how the global order might make room for greater local self-determination and cultural diversity. In examining this transformative era, *War at the Margins* adds an important contribution to both World War II history and to the development of global Indigenous identity.

Health Communication in the Changing Media Landscape Ravindra Kumar Vemula 2017-02-07 This book advances new understandings of how technologies have been harnessed to improve the health of populations; whether the technologies really empower those who use information by providing them with a choice of information; how they shape health policy discourses; how the health information relates to traditional belief systems and local philosophies; the implications for health communicators; how certain forms of silence are produced when media articulates and problematizes only a few health issues and sidelines others; and much more. The book brings together current research and discussions on the three areas of policy, practices and theoretical perspectives related to health communication approaches in developing countries, presenting well-researched and documented essays that will prove helpful for academic and scholarly inquiry in this area.
