The Mechanisms of Fast Reactions in Solution

Edward Caldin 2001 Published a few years after the author's death, this volume is a sequel to his 1964 book, *Fast Reactions in Solution*; the material is entirely new, extending investigation beyond now well-established fast-reaction techniques to consider their contribution to understanding events on the molecular scale. After an introductory chapter on origins, methods, mechanisms, and rate constants, coverage includes the rates of diffusion-controlled reactions, mathematical theory of diffusion, flash photolysis techniques, fluorescence quenching, Marcus theory involving proton-transfer and group-transfer reactions in solutions, and electron-transfer reactions. Essentials of Oceanography Alan Trujillo 2019-04-15 For courses in oceanography. Dive in to oceanography with trusted content and innovative media As the bestselling brief book in the oceanography market, *Essentials of Oceanography* combines dynamic visuals and a student-friendly narrative to bring oceanography to life. The text's engaging features and the extensive suite of animations and videos keep

students interested and excited about the material. The 13th Edition creates an interactive learning experience that provides tightly integrated text and digital offerings to make oceanography approachable and digestible for students. An emphasis on the process of science throughout the text provides students with an understanding of how scientists think and work. The new edition also helps students develop the scientific skill of practicing and interpreting data with new Exploring Data features supported by Mastering Oceanography coaching activities. A new Creature Feature provides fun facts about marine animals to engage students. Also available as a Pearson eText or packaged with Mastering Oceanography Pearson eText is a simple-to-use, mobile-optimized, personalized reading experience available within Mastering Oceanography. It lets students highlight, take notes, and review key vocabulary all in one place - even when offline. Seamlessly integrated videos and other rich media engage students and give them access to the help they need, when they need it. Educators can easily share their own notes with students so they see the connection between their eText and what they learn in class. Mastering™ is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and improves results for each student. Built for, and directly tied to the text, Mastering Oceanography enables an extension of learning allowing students a platform to practice, learn, and apply outside of the classroom. Research Methods in Library and Information Science Lynn Silipigni Connaway 2021-05-24 The seventh edition of this frequently adopted textbook features new or expanded sections on social justice research, data analysis software, scholarly identity research, social networking, data science, and data visualization, among

other topics. It continues to include discipline experts' voices. The revised seventh edition of this popular text provides instruction and guidance for professionals and students in library and information science who want to conduct research and publish findings, as well as for practicing professionals who want a broad overview of the current literature. Providing a broad introduction to research design, the authors include principles, data collection techniques, and analyses of quantitative and qualitative methods, as well as advantages and limitations of each method and updated bibliographies. Chapters cover the scientific method, sampling, validity, reliability, and ethical concerns along with quantitative and qualitative methods. LIS students and professionals will consult this text not only for instruction on conducting research but also for guidance in critically reading and evaluating research publications, proposals, and reports. As in the previous edition, discipline experts provide advice, tips, and strategies for completing research projects, dissertations, and theses; writing grants; overcoming writer's block; collaborating with colleagues; and working with outside consultants. Journal and book editors discuss how to publish and identify best practices and understudied topics, as well as what they look for in submissions.
