[Doctor Ox's Experiment and Other Short Stories](#) Jules Verne 2015-10-19 Doctor Ox's Experiment and Other Short Stories by Jules Verne Jules Verne pioneered the genre of science-fiction. He is best known for his novels ""Journey to the Center of the Earth"" (1864), ""Twenty Thousand Leagues Under the Sea"" (1870), and ""Around the World in Eighty Days"" (1873). Verne wrote about space, air, and underwater travel before navigable aircraft and practical submarines were invented, and before any means of space travel had been devised. He is the third most translated author of all time. His prominent novels have been made into films. Verne, along with H. G. Wells, is often referred to as the ""Father of Science Fiction."" Canadian Federalist Experiment Frederick Vaughan 2003-05-12 He then argues that Trudeau's 1982

Charter quietly undermined the monarchic character of the constitution by introducing republican principles of government. The result has been old institutional structures at odds with the republican ambitions, leaving Canada clinging to the wreckage of the old aristocratic order while attempting to provide a new order founded on republican equality. Vaughan shows how, at the time of Confederation, Edward Freeman, a Cambridge historian who convinced John A. Macdonald to experiment with what no one had ever heard of before, a "monarchic federation," and Jean-Louis DeLolme, a popular French authority on the English constitution, helped forge a new federal constitution with a strong central government and a chief executive armed with the powers necessary to govern. Vaughan examines how these principles were undermined by the judicial activism of the Judicial Committee of the Privy Council, which paved the way for the significant expansion of judicial power under the Charter since 1982.
