Genomics and Society Martin W. Bauer 2013-06-17 The impact of genomics on society has been the focus of debate and conflict across the world. Contrasting views of risks and benefits, trust in science and regulation, the understanding of science, media coverage and mobilization of the public by civil society groups all have been cited as drivers of public opinion. The long running controversy is a signal that the public's view cannot be ignored in the development and implementation of new technologies arising out of genomics such as agricultural biotechnologies, genetic testing and the uses of genetic information, the cloning of human cells and tissues and transgenic animals. Written by a progressive international group of social scientists from Europe, North America and Japan, this volume presents a series of comparative perspectives on the social, ethical and legal implications of genomics. The result is a book which encapsulates the lessons to be learned from the controversies of the 1990s and raises the level of debate on the societal implications of new developments in genomics.

Neurosociology David D. Franks 2010-04-19 As a career sociologist I first became interested in neurosociology around 1987 when a graduate student lent me Michael Gazzaniga's The Social Brain. If the biological human brain was really social, I thought sociologists and their students should be the first, not the last, to know. As I read on I found little of the clumsy reductionism of the earlier biosociologists whom I had learned to see as the arch-emy of our field. Clearly, reductionism does exist among many neuroscientists. But I also found some things that were very social and quite relevant for sociology. After reading Descartes's Error by Antonio Damasio, I learned how some types of emotion were necessary for rational thought - a very radical innovation for the long-honored "objective rationalist." I started inserting some things about split-brain research into my classes, mispronouncing terms like amygdala and being corrected by my students. That instruction helped me realize how much we professors needed to catch up with our students. I also wrote a review of Leslie Brothers' Fridays Footprint: How Society Shapes the Human Mind. I thought if she could write so well about social processes maybe I could attempt to do something similar in connection with my field. For several years I found her an e-mail partner with a wonderful sense of humor. She even retrieved copies of her book for the use of my graduate students when I had assigned it for a seminar.
