Encounters with Islam Lawrence Rosen 2023-09-14 Too often, Western encounters with the Islamic world commence with stereotypes and end with a renewed distance. Drawing from decades of experience studying the Muslim world, Lawrence Rosen challenges these narrow understandings. Adopting an interdisciplinary approach, Rosen shows the wide-ranging significance of Muslim art, culture, and law around the world. Exploring political, economic, and social encounters within and with the Muslim world across the eras, he considers a wide range of contexts - from fifteenth-century mosaics in Central Asia that reveal a complex understanding of mathematics, to the political choices available to the youth of modern-day Morocco and Cairo. With in-depth analyses of art, law, and religion, and how they informed one another, Rosen develops a vibrant, nuanced portrait of the Islamic world. Drawing linkages across time, regions, and cultures, this is a significant anthropological study of the Islamic world from a seasoned scholar.

**Perspective: Selected Essays on Space in Art and Design** Sarina Miller 2023-09-12 'Perspective: Selected Essays on Space in Art and Design' explores the ways in which visual and physical space have been designed and experienced in different cultures. This book amplifies the significance of space as a design element by examining its implications in various contexts through a global perspective of art and design.

*Islamic Geometric Patterns* Jay Bonner 2017-08-17 The main focus of this unique book is an in-depth examination of the polygonal technique; the primary method used by master artists of the past in creating Islamic geometric patterns. The author details the design methodology responsible for this all-but-lost art form and presents evidence for its use from the historical record, both of which are vital contributions to the understanding of this ornamental tradition. Additionally, the author examines the historical development of Islamic geometric patterns, the significance of geometric design within the broader context of Islamic ornament as a whole, the formative role that geometry plays throughout the Islamic ornamental arts (including calligraphy, the floral idiom, dome decoration, geometric patterns, and more), and the underexamined question of pattern classification. Featuring over 600 beautiful color images, *Islamic Geometric Patterns: Their Historical Development and Traditional Methods of Construction* is a valuable addition to the literature of Islamic art, architecture and geometric patterns. This book is ideal for students and scholars of geometry, the history of mathematics, and the history of Islamic art, architecture, and culture. In addition, artists, designers, craftspeople, and architects will all find this book an exceptionally informative and useful asset in their fields. Jay Bonner is an architectural ornamentalist and unaffiliated scholar of Islamic geometric design. He received his MDes from the Royal College of Art in London (1983). He has contributed ornamental designs for many international architectural projects, including the expansion of both the al-Masjid al-Haram (Grand Mosque) in Mecca, and the al-Masjid an Nawabi (Prophet's Mosque) in Medina, as well the Tomb of Sheikh Hujwiri in Lahore, and the Ismaili Centre in London - to name but a few. He is committed to the revitalization of Islamic geometric design through the teaching of traditional methodological practices. To this end, in addition to publishing, Jay Bonner has lectured and taught design seminars at many universities and conferences in North America, Europe, North Africa and Asia.

Antique Rugs from the Near East Wilhelm von Bode 1922 This handbook contains black-and-white pictures and describes groupings of Middle Eastern rugs, their patterns, coloring, manufacture, and estimated antiquity. Substantial changes were made between the first and third

editions, including the deletion of a whole group of rugs and additions based on new research. The translator was able to add notes based upon his own research into the ownership of certain rugs.

**A History of the Arab Component in Ibero-American Architecture**

Fernando Luis Martínez Nespral 2026-02-12 This book examines five centuries of Ibero-American architectural history through the lens of its Arabic architectural component. It seeks to illuminate an integral part of Ibero-American culture—one that is frequently ignored and undervalued as merely an exotic influence. Fernando Martínez Nespral's *A History of the Arab Component in Ibero-American Architecture* stands as a landmark contribution to our understanding of the region's architectural heritage, inviting us to see the world through new eyes and to embrace the rich tapestry of cultures that have shaped our shared landscape. It is a book that will resonate with scholars and enthusiasts alike, inspiring us to explore the hidden corners of history and celebrate the diversity that lies at the heart of Ibero-America's architectural identity. Fernando Luiz Lara, Professor of Architectural History and Theory at the Weitzman School of Design, University of Pennsylvania.
