**Research Funding and Resource Manual** Harold Alan Pincus 1995  
The Research Funding and Resource Manual: Mental Health and Addictive Disorders, is a compendium of information on where and how to get funding for mental health and addictive disorders research. This manual contains a comprehensive listing of funding sources available to junior and senior researchers in psychiatry, psychology, neuroscience, and behavioral sciences. It addresses a broad array of topics to assist investigators and trainees in developing resources to support research projects and career development activities and in responding to science policy issues. The manual contains unique information about grant writing and the grants process, research training, research ethics, and animal research, as well as lists of federal, state, and industry research contacts. It also contains detailed descriptions and publication policies for over 120 scientific journals. Each chapter includes narrative information related to research and policy issues, as well as comprehensive resource sections.

**How to mainstream sustainability and circularity into the bioeconomy?** Food and Agriculture Organization of the United Nations 2021-08-31 In its 2020 communiqué, the International Advisory Council on Global Bioeconomy has urged to strengthen good practices and policies to advance the global bioeconomy. The transition from a fossil-based economy to a bioeconomy happens at three levels: technological, organizational and social. In particular, agri-food systems are key to achieve a shift to sustainable and circular production and consumption patterns, since they occupy the biggest share of the bioeconomy from an economic, value-added perspective as well as having potential for discovery and innovation. This Compendium outlines 250 sources of good practices and policies. It covers the entire continuum of economic sectors that have a stake in biological knowledge and resources. The Compendium, therefore, highlights the wide range of aspects that are included in the concept of the bioeconomy. Being an inherently multisectoral process that involves potential synergies and trade-offs among different sustainability objectives, the implementation of bioeconomy strategies presents greater challenges than activities that are focused on a single sector. The report also shows how good practices and policies contribute to the translation of bioeconomy strategies into coordinated actions for the achievement of local priorities and sustainability goals, while also addressing global issues. Overall, the review identifies a knowledge gap: Assessments do not always indicate if practices and policies have enough evidence of impact to be recommended as models that contribute to sustainability objectives of the bioeconomy. To address this, a context-specific approach described in Chapter 5, provides support for countries to make evidence-based decisions on policies and investments for the bioeconomy. The approach helps to identify good practices and policies ex-ante, which can help achieve common sustainability objectives of bioeconomy strategies that were presented in the 2019 FAO report, Towards sustainable bioeconomy - Lessons learned from case studies. Taken together, this Compendium and the 2019 report, provide practical guidelines and resources that can support decision-makers and stakeholders in bioeconomy systems to make progress towards reaching sustainable outcomes.

**The Health Improvement Profile: A manual to promote physical wellbeing in people with severe mental illness** Sheila Hardy, Jacqui White and Richard Gray 2015-04-24 This practical guide, written by experts in mental health nursing, is designed to support healthcare practitioners in checking the physical health of people with severe mental illness (SMI). As life expectancy is reduced by 12 to 19 years in people with SMI, this patient group should receive a physical health check at least once a year. Yet many mental health practitioners have not been trained to assess their physical health needs, and even when such training is offered it may be difficult to access it because of clinical workloads. The Health Improvement Profile (HIP) provides an efficient, effective, evidence-based physical health check tool specifically designed to be used when assessing people with SMI. It supports practitioners in identifying

physical health problems and guides them towards evidence-based interventions to address common health issues affecting people with SMI, ranging from cardiovascular disease to lifestyle factors such as diet, alcohol and smoking. Contents include: Introduction What is severe mental illness? What treatments are used in severe mental illness? Systems of the body that are commonly affected in people with severe mental illness Common physical comorbidities in people with severe mental illness Cardiovascular disease in people with severe mental illness Problematic behaviours affecting health in people with severe mental illness How to use the Health Improvement Profile (physical health check tool) Changing behaviour to improve health Appendix 1: Health Improvement Profile (HIP) - Female Appendix 2: Health Improvement Profile (HIP) - Male

Pathy 2006 The fourth edition of 'Principles and Practice of Geriatric Medicine' provides an account of the fundamental changes associated with ageing, which are essential to our understanding and management of the elderly sick population. The title has been updated to reflect in treatment options and medical conditions.

**Exploring Osaka** David M. Dunfield 1993 A comprehensive English-language guide to the city of Osaka for business travellers and tourists alike. Second only to Tokyo as a banking and trade centre of Japan, Osaka is a centre of tradition and culture as well - the home of bunraku puppet theatre, for example - and is minutes by rail from Japan's ancient capitals of Kyoto and Nara. A variety of suggested sightseeing itineraries are included, as well as recommended museums, restaurants and hotels, a list of festival dates and sources of additional information.
