Leverage Leadership Paul Bambrick-Santoyo 2012-06-06
Paul Bambrick-Santoyo (Managing Director of Uncommon Schools) shows leaders how they can raise their schools to greatness by following a core set of principles. These seven principles, or "levers," allow for consistent, transformational, and replicable growth. With intentional focus on these areas, leaders will leverage much more learning from the same amount of time investment. Fundamentally, each of these seven levers answers the core questions of school leadership: What should an effective leader do, and how and when should they do it. Aimed at all levels of school leadership, the book is for any principal, superintendent, or educator who wants to be a

transformational leader. The book includes 30 video clips of top-tier leaders in action. These videos bring great schools to you, and support a deeper understanding of both the components of success and how it looks as a whole. There are also many helpful rubrics, extensive professional development tools, calendars, and templates. Explores the core principles of effective leadership Author's charter school, North Star Academy in Newark, New Jersey, received the highest possible award given by the U.S. Department of Education; the National Blue Ribbon Print version includes an instructive DVD with 30 video clips to show how it looks in real life. E-book customers: please note that details on how to access the content from the DVD may be found in the e-book Table of Contents. Please see the section: "How to Access DVD Contents" Bambrick-Santoyo has trained more than

1,800 school leaders nationwide in his work at Uncommon Schools and is a recognized expert on transforming schools to achieve extraordinary results. **Through the Fire** Fredrick E. Vars 2026-05-05 Mental health touches every aspect of life in the United States: from police encounters to prisons, and from hospitals to housing, those suffering from mental illness are overrepresented and underserved. In *Through the Fire*, leading expert in the field of mental health law Fredrick Vars reveals that some of the most promising reforms are coming from within the community of individuals living with mental illness. In this personal and compassionate survey of mental health in America, readers meet the real-life advocates working on the frontlines of reform. Through their stories, and bolstered by his own experience inside the system after suffering a psychotic break, Vars reveals that hopeful solutions are already in action. Illustrating key reforms

such as respite housing programs, unique peer-to-peer services, and Assertive Community Treatment (ACT), a highly effective but underused model for supporting people with serious mental health problems outside of institutions, *Through the Fire* shows that lasting change requires a paradigm shift: Mental illness is a disease, not a character flaw. Empowering people with mental illness to become effective advocates and mentors for themselves and others may be the spark to fuel much-needed change. *Qualitative Data Analysis with NVivo* Kristi Jackson 2019-04-08 Engaging and accessible, this book offers students a complete guide to using NVivo for qualitative data analysis.
