Psych Conc/Conn Spencer A. Rathus 2003-07 PSYCHOLOGY: CONCEPTS AND CONNECTIONS, BRIEF EDITION, will help your students make the connections between key concepts in psychology and the connections between those concepts and their own lives. Spencer Rathus's warm and engaging writing style explains the fundamentals in ways that students can understand, and then goes a step further to show how those fundamentals relate to students' daily lives. Rathus's commitment to helping students learn goes beyond the text narrative and is reflected in the text's proven active learning system, PQ4R (Preview, Question, Read, Reflect, Review, and Recite). This system is seamlessly integrated into the book's companion Connections CD-ROM, the Book Companion Web Site, and the Study Guide--all of which are FREE with every new copy of the text. New "Learning Connections" and "Life Connections" sections in the text also include icons that cue students to interactive content on the Connections CD-ROM and the Book Companion Web Site. This seamless integration of text and technology enhances the active learning system, PQ4R, in the text, and gives students multiple ways to connect with the text's current research and relevant applications. In this edition, Rathus invites students to learn about the latest in evolutionary psychology, biology, diversity, and gender issues in psychology--in a text that is concise yet thorough.

Sustaining the Earth Tyler G Miller 2003 Miller's SUSTAINING THE EARTH, 6th Edition is a science-based book designed for introductory courses in environmental science. The reason Tyler Miller has been the most successful author in environmental science, academic writing is his attention to currency, trend setting presentation of content, ability to predict student and instructor supplement needs, and unique ability to retain the hallmark characteristics. In this edition Miller has added an on-line Web based resource, a Resource Integration Guide. Updated quarterly with articles from InfoTrac College Edition service, CNN Today Video Clips, and animations, instructors will be able to seamlessly incorporate the most current news articles and up-to-the minute research findings to support classroom instruction and text presentations The content in the 6th edition of SUSTAINING THE EARTH is everything you have come to expect and more. Two new chapters on basic ecology (Chapters 3 and 4) have been added to this edition to enhance this science-based book This text differs from Miller's comprehensive text, LIVING IN THE ENVIRONMENT, 13th Edition, because there is much less detail and more integration of topics, with a different chapter order. For example, the following topics have been integrated into single chapters: human population dynamics and urban problems are in Chapter 5, nonrenewable and renewable energy resources are in Chapter 6, terrestrial and aquatic biodiversity are in Chapter 7, soils, food production, and pesticides are in Chapter 8, climate change, ozone depletion, and air pollution are in Chapter 11, water resources and water pollution are in Chapter 12, solid and hazardous waste are in Chapter 13, and environmental economics, politics, and worldviews are in Chapter 14. For the first time ever in a Miller textbook, students will receive a CD-ROM entitled Interactive Concepts in Environmental Science. This groundbreaking addition integrates nearly 100 engaging animations and inte

Nurse Management Demystified Irene McEachen 2006-11-13 This new addition to the Demystified series offers practical, easy-to-understand management advice just for nursing students, nurses, or other types of medical facility administrators faced with the challenge of managing and motivating a staff.

Communicate! Rudolph F. Verderber 2005 This market-leading text is continually praised by reviewers for its clear, practical, and successful method of training students to master the skills of human communication. This introductory human communication text covers interpersonal communication, small group communication, and public speaking. With a consistent model of theoretical explanation followed by numerous practical examples, activities, sample visual scenarios and speeches, self-assessment, and review, students cannot help but to become ethical, competent communicators in our mediated world.

Differentiating Science Instruction and Assessment for Learners With Special Needs, K-8 Kevin D. Finson 2011-03-02 Field-tested strategies for teaching science to students with special needs Teachers are required to provide appropriate science instruction to all students, including children with special needs. However, they are often left on their own to figure out how to effectively differentiate lessons and activities. Help is here! This timely, practical guidebook shows general and special educators how to retool science activities and assessments for students with learning disabilities, behavior disorders, and more. The authors cover a broad range of topics in an orderly, concise fashion, including: - National and state requirements for student learning and science literacy - Pedagogical strategies for collaborative learning groups, self-paced learning centers, literature circles, and team projects - Grade-appropriate ways to revise science activities and assessments for biology, earth science, and physical science lessons - Step-by-step instructions for using rubrics for evaluation, revision, and assessment - Information on teacher collaboration and specific disabilities Also included are vignettes and checklists to assist teachers in bridging the gap between science and special education instruction and assessment. By adjusting the content, teaching critical thinking, and providing a variety of ways for learners to demonstrate their knowledge, you will give all students the chance to achieve academic success in science.

Test and evaluation management guide

Environmental Geology Carla W. Montgomery 2003-04 Intended for the introductory-level college course, the principal aim of this text is to present the student with a broad overview of environmental geology. The text looks both at how the earth developed into its present condition and where matters seem to be moving for the future. It is hoped that this knowledge will provide the student with a useful foundation for discussing and evaluating specific environmental issues, as well as for developing ideas about how the problems should be solved.

Marriages and Families Karen Seccombe 2004 In this fresh, more structural, alternative to other texts for the marriage and family course, Seccombe and Warner provide a comprehensive look at close relationships and the family in just 15 chapters. Examining close relationships and families by placing them in social context, the authors offer a unique emphasis on the structural and relational aspects of the family with a focus on family resilience. The text weaves together a macro view - social structural analysis of close relationships- with the macro - an individualist view. The authors demonstrate the interaction of theory and methodology in family studies in Chapter 2 and blend cutting-edge research and practical applications throughout. Among the highlights of this first edition are the exceptionally thorough exploration of the topics of singlehood and cohabitation in Chapter 7 and the unique six-chapter core (8-13) that focuses on all aspects of parenthood and the challenges and crises that families face today. The authors' emphasis on family resilience and how families can be strengthened is reflected in the Constructing Strong Families boxes that appear throughout the text. These features encourage students to apply groundbreaking research on what makes a family strong to their own families and in the concluding chapter, Looking Ahead: Helping Families Flourish, which examines the factors that successful families -regardless of ethnicity, culture, or social class--consistently exhibit.
