Teaching Reading Pamela J. Farris 2004 A Balanced Approach to Literacy Instruction provides students with a strong background in using a balanced approach to literacy instruction. Using the National Standards for English Language Arts as a guide, the book calls for classroom teachers to become knowledgeable of and to master several literacy instructional practices, applying each when appropriate. A wide variety of literacy instructional practices are clearly presented. Theories are accompanied by practical, research-based ideas that students can use as they complete their field-based experiences and go out into their own classrooms. In addition to its in-depth coverage of phonics, comprehension, assessment, and vocabulary instructional strategies, A Balanced Approach to Literacy Instruction has wide coverage of technology and writing. Ways to meet the needs of diverse student populations are discussed throughout the book. Students also are provided with thorough lesson plans in reading, writing, and technology for them to consider using or adapting for their field based experiences.

Survey of Astronomy Parent Lesson Plan 2013-10-01 Course Description: Taking Back Astronomy: Take a breathtaking look at the universe in this comprehensive guide to the heavens! Sit back and explore the world at your fingertips. This book explains the scale and size of the universe that is hard for our minds to imagine, yet can only indicate the Master's hand at work. Marvel at over 50 full-color, rarely seen photos of stars, nebulae, and galaxies. Study the facts that challenge secular theories and models of the universe-how it began and how it continues to amaze the scientific

community. Explore numerous evidences that point to a young universe: magnetic poles of planets, the spiral shape of galaxies, comets and how long scientists think they can last, and much more. Step out among the stars and experience the truly awesome power of God through this glimpse of His vast creation. Our Created Moon: For eons the moon has intrigued humanity. From its creation through the current issues of space exploration the moon has been both a light in the night and a protective shield of earth placed perfectly by God, regulating our seasons and keeping our atmosphere purified. Billions of dollars have been spent to reach its surface and discover its secrets; open these pages and discover those secrets for yourself. The Stargazer's Guide to the Night Sky: Explore the night sky, identify stars, constellations, and even planets. Stargaze with a telescope, binoculars, or even your naked eye. Allow Dr. Jason Lisle, a research scientist with a masters and PhD in astrophysics, to guide you in examining the beauty of God's Creation with 150 full color star-charts. Learn the best ways and optimal times to observe planets and stars with easy to use illustrations. Create or expand the hobby of stargazing; an outdoor, educational hobby to enjoy with friends or family. Our Created Moon DVD: In this illustrated presentation, Dr. Don DeYoung looks at four of the most popular ideas evolutionists have to offer regarding the moon's origin, and logically concludes that this "lesser light" could only have been placed in its orbit by an all-knowing, all-powerful Creator. Created Cosmos DVD: Our universe is truly an amazing thing. The vastness of space boggles the mind, and the beauty of diversity we find there points to a Creator. The Psalmist wrote, "When I consider Your heavens, the work of Your fingers, the moon and the stars, which You have ordained, what is man that You are mindful of him, and the Son of man that You visit him?" Take a tour through the universe during this awe-inspiring presentation.
