Safeguarding and Child Protection: 0-8

Years, 4th Edition Jennie Lindon 2012-12-14

"This is a brilliant book and a godsend for anyone working in child care at any level. This will become the standard for child care -- it is quite simply the best book available anywhere on safeguarding children." Michele Elliott OBE, Founder, Kidscape Safeguarding children and young people will provide you with essential information to ensure high standards for child protection across early years settings, schools and play provision. The book covers key legislation and guidance, with clear implications for practice. Full explanation of terms, examples to encourage reflection and scenarios all support a full understanding of this complex subject. This new edition integrates recent developments over vetting and barring and brings readers up to date with changes in the system for safeguarding. New content reflects increased concern about health issues like childhood obesity and a safe approach to use of image technology on mobile phones. Practitioners are given the tools to address continuing dilemmas around partnership with families, the role of physical contact and how to blend safeguarding with best practice for equality.

Flexibility in Global Climate Policy Tim Jackson 2023-04-21 Since the adoption of the Kyoto Protocol to the United Nations Framework Convention on Climate Change in 1997, the negotiation of policy responses to climate change has become an area of major research. This authoritative volume sets out the main debates and processes of joint implementation - bilateral or multilateral investments in greenhouse gas emission reduction or sequestration - and explores the issues involved in constructing an appropriate institutional framework. It examines the key economic, environmental, social and ethical impacts, and assesses the operational design of the flexibility mechanisms of joint implementation, including emissions trading and the Clean Development Mechanism. An approach is developed in which streamlined assessment procedures are combined with institutional safeguards in order to balance the demand for practical mechanisms with the environmental objectives of the Protocol. The book provides detailed case studies of energy sector investment in Eastern European host countries.
