ultrasound, and indocyanine green enabled better understanding of select pertinent physiology and delineation of perforators anywhere in the body. Greater anatomical knowledge and the ability to map the course of individual perforators is reflected in the updated third edition by renowned global experts and editors of the prior editions, Phillip N. Blondeel, Steven F. Morris, Geoffrey G. Hallock, and Peter C. Neligan. The primary goal of the third edition is to discuss evidenced-based perforator concepts and techniques that have been incorporated into global practice worldwide. Although condensed into a single volume, the new edition follows a similar format as prior editions, with chapters divided into four sections. The first section provides a solid foundation of knowledge with discussion of rudimentary fundamentals. The second section illustrates the use of basic types of local perforator flaps; introduces the vascularized dermal graft; describes routine suprafascial flap

dissections with perforators themselves as recipient and donor vessels; lymphatics reconstituted in concert with perforator flaps; and how to minimize donor site morbidity with “kiss” flaps. The third section outlines basic anatomy and techniques for common perforator flaps, while the fourth section provides a brief overview of suggested preferences for clinical applications, with both sections organized by body region. Key Features Fifty-nine chapters with contributions from leading worldwide experts present trailblazing opinions and how-to tutorials Sixty-five videos provide invaluable visual insights on how to successfully harvest donor sites, transfer tissue, and create a wide range of perforator flaps The latest updates including microsurgery, ICG angiography, lymphedema surgery, skin perforator flaps, and keystone flaps Algorithms and summary boxes offer quick access to essential information, while stepwise photos provide additional guidance on challenging techniques This must-have text and

video resource provides reconstructive plastic surgeons with a solid foundation of vascular anatomy knowledge, techniques for particular selections, and utilization of perforator flaps for all clinical situations.
