A Supplement to the Oxford English Dictionary

R. W. Burchfield 1972 These volumes replace the 1933 Supplement to the OED. The vocabulary treated is that which came into use during the publication of the successive sections of the main Dictionary -- that is, between 1884, when the first fascicle of the letter A was published, and 1928, when the final section of the Dictionary appeared -- together with accessions to the English language in Britain and abroad from 1928 to the present day. Nearly all the material in the 1933 Supplement has been retained here, though in revised form (Preface).

International Conference on Sustainable Planning, Architecture and Civil Engineering (SPACE 2026) Prof. H.K. Sharma 2026-01-21 This book presents the proceedings of the International Conference on Sustainable Planning, Architecture and Civil Engineering (SPACE 2026), hosted by the National Institute of Technology Kurukshetra. In an era of rapid urbanization and climate change, building resilient and sustainable infrastructure has become an urgent global imperative. This volume addresses that need, offering a vital platform for interdisciplinary dialogue among researchers, architects, engineers, and policymakers. Focusing on the integration of sustainability across the entire lifecycle of the built environment, the compendium explores innovative theories and practical applications.

Key themes include sustainable architecture, smart infrastructure, energy-efficient technologies, water management, and the use of advanced digital tools like AI, IoT, and GIS. Featuring rigorously peer-reviewed research papers organized into thematic sections, this publication serves as a valuable reference for academics and professionals. It aims to stimulate further innovation and collaboration, providing actionable insights for developing the sustainable, resilient cities of the future. The collective knowledge within these pages contributes meaningfully to the global pursuit of balanced and inclusive growth.

Insights Into Specialized Translation Maurizio Gotti 2006 This volume focuses on specialist translation - one of the areas of translation in greatest demand in our age of globalization. The 16 chapters deal not only with the classical domains of science and technology, law, socio-politics and medicine but also with lesser researched areas such as archeology, geography, nutrigenomics and others. As a whole, the book achieves a blend of theory and practice. It addresses a variety of issues such as translation strategy based on text type and purpose, intercultural transfer and quality assessment, as well as textual and terminological issues in bilingual and multilingual settings, including international organizations and the European Union. Today translation competence presupposes multidisciplinary skills. Whereas some chapters analyze the linguistic features of special-purpose texts and their function in specialized communication, others show how specialized translation has changed as a result of globalization and how advances in technology have altered terminology research and translation processing.
