The Role of African Universities in the Attainment of the Millennium Development Goals 2006

When Helping Hurts Steve Corbett 2009-06-24 Churches and individual Christians typically have faulty assumptions about the causes of poverty, resulting in the use of strategies that do considerable harm to poor people and themselves. *When Helping Hurts* provides foundational concepts, clearly articulated general principles and relevant applications. The result is an effective and holistic ministry to the poor, not a truncated gospel. A situation is assessed for whether relief, rehabilitation, or development is the best response to a situation. Efforts are characterized by an "asset based" approach rather than a "needs based" approach. Short term mission efforts are addressed and economic development strategies appropriate for North American and international contexts are presented, including microenterprise development.

Decentralization and Economic Development in Nigeria Nwafejoku Okolie Uwadibie 2000-01-19

This is the only book of its kind to address the effect of agricultural decentralization on the Nigerian national economy. In his effort to demonstrate how decentralization promotes development that can economically empower individuals, Uwadibie thoroughly analyzes three key aspects of Nigeria's decentralization policy. These are the Local Government Reform Act of 1976, the creation of new states, and the implementation of the Structural Adjustment Program (SAP). Together, these policies reduced the overall role of the federal government in the national economy by diverting revenue to states and dissolving the federal government's direct ownership of agricultural enterprises. Based on his extensive research, Uwadibie concludes by making a number of additional policy recommendations that he believes are essential for Nigeria to become self-sufficient in food production. Those with an interest in African studies, economic development, or agricultural production will find much to their liking in this work.

The Transformation of Southeast Asian

Economies Teofilo C. Daquila 2007 This book analyses the growth, development and crisis experiences of the Southeast Asian economies, in particular, Indonesia, Malaysia, the Philippines, Singapore and Thailand -- also known as ASEAN-5. The proposition is developed that the robust economic performance of the Southeast Asian economies during the past four decades has been attributed to the various factors, developments and independent national policies which have been pursued by the individual member countries rather than to any regional economic framework. The book covers eleven topics which is suitable for a one-semester course on the economics of Southeast Asia. Also, it has a narrower area coverage as it focuses only on the five economies, namely, Indonesia, Malaysia, the Philippines, Singapore, and Thailand. The sectoral treatment of the crisis impact and the analytical treatment of policy responses to the crisis differentiate this

book from other publications on the same topic. Finally, the book provides an analysis of national developments, policies and factors which have contributed to the economic transformation of the respective Southeast Asian economies.

The Long Shadow of Informality Franziska Ohnsorge 2022-03-01 This study is the first comprehensive analysis of the extent of informality and its implications for a durable economic recovery and for long-term development.

Environmental Economics Duane Chapman 2000 Environmental Economics: Theory, Application, and Policy's strong policy-oriented approach to environmental economics draws in current research and case studies to illustrate topics on the cutting edge of worldwide policy debates. The author introduces students to subjects such as biodiversity, climate change, air pollution, and forestry by presenting the actual data and methods used by experts in these fields. In addition, considerable material on emerging areas such as macroeconomics and trade, agriculture, ecological economics, and sustainability gives students a full understanding of the environmental economics field. The book's focus on basic economic concepts in the introductory chapters prepares students to understand these issues. Chapman does not discuss economics in the abstract: examples, historical contexts, and case studies are used to illustrate key points. And throughout the book, there is a heavy emphasis on social issues and ethics. *Strong policy approach - seen in its integration of practical examples and issues that are both domestic and international in nature - combines scientific and economic interpretations of environmental problems *Focus on core economic th

The Political Economy of Development: Resources and sectors in development

Amitava Krishna Dutt 2002 This three-volume set collects previously published articles in the field of development economics, covering alternative approaches and going beyond the boundaries of economics narrowly defined. Some of the included papers are classic contributions, some are authoritative survey articles and others are more recent contributions. The collection covers topics such as: underdevelopment, growth and income distribution; resources in development; sectoral issues; open economy issues; and economic policies and institutions. The final section offers appraisals of the present state and future evolution of development economics.

Regional Economics: Fundamental Concepts, Policies, And Institutions Iwan Jaya Azis 2020-01-06 Regional Economics: Fundamental Concepts, Policies, and Institutions is a unique and unconventional economics textbook which emphasizes the role of 'space' in economics and highlights the importance of non-economic factors particularly the role of institutions in regional development. It also presents the approach on how to evaluate regional development performance based on economic, social, and environmental considerations, which

is the organizing principle for meeting people-oriented development and sustainable development goals. Other essential concepts such as 'regional science' and 'spatial economics' are also explored in this book. Why activities tend to be spatially concentrated and can get more intensified despite efforts to disperse them toward other regions? Why infrastructure development intended to increase activities and improve the population's welfare can produce the opposite outcome of greater interregional inequality? What is the role of regional and national policies in affecting growth incentives, and how non-economic factors such as institutions and the quality of local leaders can make a difference in welfare achievement? Addressing these questions allows readers to better understand the various phenomena in the actual development process.
