The Storyteller's Sourcebook Margaret Read MacDonald 1982 The Storyteller's Sourcebook is the first reference tool to bring together from children's collections variants of each folktale, and to supply descriptions of them. It is specifically designed for quick and easy access by the teacher or librarian who wants to locate (1) tales about a given subject, (2) the location of a specific tale title in collections, (3) tales from an ethnic or geographical area, (4) variants of a specific tale. - p. ix.

Emily Dickinson Ann Beebe 2022-03-18 The public is familiar with the Emily Dickinson stereotype--an eccentric spinster in a white dress flitting about her father's house, hiding from visitors. But these associations are misguided and should be dismantled. This work aims to remove some of the distorted myths about Dickinson in order to clear a path to her poetry. The entries and short essays should open avenues of debate and individual critical analysis. This companion gives both instructors and readers multiple avenues for study. The entries and charts are intended to prompt ideas for classroom discussion and syllabus planning. Whether the reader is first encountering Dickinson's poems or returning to them, this book aims to inspire interpretative opportunities. The entries and charts make connections between Dickinson poems, ponder the significance of literary, artistic, historical, political or social contexts, and question the interpretations offered by others as they enter the never-ending debates between Dickinson scholars.

ESTUDOS SOBRE OS REGISTROS VISUAIS, TÁTEIS E SIGNWRITING PARA AUXÍLIO DA COMUNIDADE COM SURDOCEGUEIRA Andressa França 2023-09-26 Esta obra descreve os estudos direcionados às escritas de sinais para a surdocegueira, a fim de que haja avanços, análises e reflexões, com o intuito de dar visibilidade às comunidades surdocegas. Para isso, é preciso repensar as formas como têm sido construídas as estratégias para os processos de ensino, aprendizagem e acessibilidade, frente às tecnologias e avanços propostos. O SignWriting foi descrito detalhadamente para desmistificar o estereótipo de um registro complexo, impreciso e confuso. Como toda e qualquer escrita de uma língua - seja ela direcionada à língua oral ou sinalizada - demanda de estudos sistematizados, treinamentos e práticas constantes, a fim de que haja avanços gradativos de domínio, até se chegar ao alcance da proficiência. Os dados a respeito das escritas de sinais ainda permanecem escassos, diante deste estudo, mas comprovam a vivacidade de seu uso em diferentes campos. A área da Ciência da Computação se destacou pela complexidade dos materiais desenvolvidos para a comunidade surda, ainda que não tenham apresentado adaptações para indivíduos com baixa visão ou cegos. Frente à surdocegueira, não foram encontradas inovações específicas sobre escritas táteis, demonstrando a fragilidade do processo de ensino e aprendizagem, principalmente, para os sinalizantes que dependem de constante transposição linguística para a compreensão de informações em diferentes sistemas e códigos.
