**The Wildcrafted Cocktail** Ellen Zachos 2017-05-16 Meet the natural lovechild of the popular local-foods movement and craft cocktail scene. It's here to show you just how easy it is to make delicious, one-of-a-kind mixed drinks with common flowers, berries, roots, and leaves that you can find along roadsides or in your backyard. Foraging expert Ellen Zachos gets the party started with recipes for more than 50 garnishes, syrups, infusions, juices, and bitters, including Quick Pickled Daylily Buds, Rose Hip Syrup, and Chanterelle-infused Rum. You'll then incorporate your handcrafted components into 45 surprising and delightful cocktails, such as Stinger in the Rye, Don't Sass Me, and Tree-tini.

**Developing Financial Leadership in Small-Medium Businesses**

Stewart Barnes 2025-03-12 Many small-medium enterprises (SMEs) are very small organisations comprising mainly single-person and micro-businesses but, in the United Kingdom, there are around 250,000 small-medium businesses (SMBs) which are substantial businesses with

turnovers of millions or tens of millions of pounds. A key requirement for thriving SMBs is effective leadership throughout the organisation. One crucial aspect, which is often overlooked, is that of financial leadership. Financial management in SMBs is often seen as a technique-based activity whereby finance staff have a limited role preparing annual financial accounts and disseminating financial information to key individuals in the organisation. They may act reactively by responding to requests for specific financial information. On the other hand, strong financial leadership is proactive, constructive and innovative and plays a critical role in ensuring that organisations stay financially adaptable and can build resilience and sustainability in today's fierce market. The most effective financial leaders have a sophisticated and thorough understanding of their organisation's financial health, and they make decisions grounded in financial realities to use that information in their communication to demonstrate the strategic connection between money, mission and purpose. This research volume asserts that understanding the importance of utilising robust financial management approaches and financial information in making business decisions and assessing business performance is the key. This is especially relevant for SMBs, as they can have a significant influence on countries' economies. It will therefore be of interest to researchers, academics, practitioners and advanced students in the fields of leadership, financial management, entrepreneurship and strategy.

**Digital Transformation of the Financial Industry** Slađana Benković 2023-01-29 This book presents a collection of state-of-the-art research findings on the digital transformation of financial services. Digitalization has fundamentally changed financial services and has a tendency to reshape the landscape of the financial industry in an unprecedented manner. Over the last ten years, the development of new financial technologies has contributed to the creation of new business and

organizational models, along with new approaches to service delivery. By encompassing significant conceptual contributions, innovations in methods and techniques, and by delineating the main applications of digital transformation in Central and Eastern Europe (CEE), the volume extends current knowledge on digital transformation in the financial industry. The book is divided into two parts. The first part provides a social-science perspective on digital transformation in the financial industry. The second part provides the most recent evidence on how financial technologies are transforming financial services on the markets, and how the adoption of modern information technologies fosters setting up new financial services. Further, this part outlines new approaches to digital transformation in the financial industry. This book will appeal to students, scholars, and researchers of finance, monetary economics, and business, as well as practitioners interested in a better understanding of the digital transformation of financial services, new financial technologies, and innovations in finance.
