Research Communications

(ARC) is an open-access, peer-reviewed international journal

covering all aspects of aeronautics and astronautics. The journal publishes original Research and Review articles related to all fields of

aerospace research, in both theory and practice. This eBook collates the articles published in the journal in its first year, the year 2023. To date the journal has published 11 articles of those 11 articles, 4 are for the Flow Control Special Issue and 7 are standard articles in the journal. This is the first issued eBook from the journal and collates

all the standard articles accepted in 2023, the first year of publication that makeup Volume 1. We are looking forward to completing the Flow Control Special Issue later in the year and the publication of the eBook of the Special Issue. [English Mechanic and Mirror of Science](#) 1913

From Animals to Animats 3

Dave Cliff 1994 August 8-12, 1994, Brighton, England From

Animals to Animats 3 brings together research intended to advance the frontier of an exciting new approach to understanding intelligence. The contributors represent a broad range of interests from artificial intelligence and robotics to ethology and the neurosciences. Unifying these approaches is the notion of "animat" -- an artificial animal, either simulated by a computer or embodied in a robot, which must survive and adapt in progressively more challenging environments. The 58 contributions focus particularly on well-defined models, computer simulations, and built robots in order to help characterize and compare various principles and architectures capable of inducing adaptive behavior in real or artificial animals. Topics include: - Individual and collective behavior. - Neural correlates of behavior. - Perception and motor control. - Motivation and emotion. - Action selection and behavioral sequences. - Ontogeny, learning, and evolution. -
