Thinker, Learner, Dreamer, Doer Peter Gamwell 2022-03-28 Master the Age of Complexity through innovative growth. From far-reaching impacts of COVID-19 to environmental and economic concerns, we're living in the Age of Complexity that will likely be with us for generations to come. How then can schools and organizations change their learning environments to foster innovative thinking in students when the Age of Complexity is always at the forefront? Peter Gamwell and Jane Daly answer that question and more by demonstrating how to understand problems the world faces as living, changing systems. Built on the philosophy that the prosperity of any organization is directly proportional to how it values its people, affords them autonomy, and gives them creative rein, this book provides resources including: A new way to define brilliance, and 10 specific ways you can shift your organization to prepare your school and community for the Age of Complexity Detailed case studies from schools excelling in the Age of Complexity Links to videos showcasing real-world students and educators in action Key takeaways highlighting each chapter's critical content Reflective questions to facilitate the application of ideas into school and district settings Actionable strategies to use in classrooms and school communities As the world continues to grow more complex, this resource provides timely direction on how to think big about innovative growth, even if the first step is small.

Environmental and Sustainability Education in Teacher Education Douglas D. Karrow 2020-01-01 This book was inspired by the inaugural National Roundtable on Environmental and Sustainability Education in Canadian Faculties of Education (Roundtable 2016), which took place June 14-16, 2016, at Trent University in Peterborough, Ontario. Roundtable 2016 brought together over seventy participants from across Canada, including educators, researchers, policy-makers, consultants, and community organizations. Over the course of three days, participants took part in keynote addresses, research colloquia, networking socials, and collaborative inquiry activities focused on Environmental Sustainability Education in Teacher Education (ESE-TE). Roundtable 2016 resulted in the publication of a National Action Plan containing action-oriented recommendations for enhancing ESE-TE, and a position statement titled "The Otonabee Declaration," where delegates articulated their views regarding environmental degradation, the critical need for enhancing ESE-TE, and, the role educators, children, youth, educational institutions, policy makers, and Indigenous communities play

in enhancing ESE-TE in Canada. This volume concludes with a discussion placing current Canadian ESE-TE theory and practice within an international context.

The Sociology of Education in Canada Terry Wotherspoon 2009 This book offers a well-rounded introduction to the sociological understanding of education, analyzing key debates and issues with references to critical research and theories of education. In this concise critical introduction, Dr Terry Wotherspoon covers all aspects of the sociology of education in Canada, including issues such as the sociology of teaching, gender and race, feminism, and globalization. The Sociology of Education in Canada is an appropriate core text for one-semester, third-year sociology courses given its coverage of the history of the education system in Canada through to present day; focus on theory; and presentation of research, recent data, and perspectives.
