## **American Automobiles of the Brass Era**

Robert D. Dluhy 2013-10-07 From Abbott-Detroit to Zip, this unique

reference book documents American gasoline-powered automobiles manufactured for the model years 1906 through 1915, the Brass Era. In these explosive early years of automotive history, a vast number of manufacturers--most of which failed within two years--produced a range of cars whose sheer diversity is unmatched in later times. The short corporate lifespans and constant change throughout the industry left a fragmented historical record, with data about specific models scarce and scattered in later sources. Here the basic facts of 4,000+ cars, painstakingly researched in all available period sources, are collected and trends of the era are analyzed.

The Affordable Housing Reader

Elizabeth Mueller 2022-07-14

This second edition of The Affordable Housing Reader provides context for current discussions surrounding housing policy, emphasizing

the values and assumptions underlying debates over strategies for ameliorating housing problems experienced by low-income residents and communities of color. The authors highlighted in this updated volume address themes central to housing as an area of social policy and to understanding its particular meaning in the United States. These include the long history of racial exclusion and the role that public policy has played in racializing access to decent housing and well-serviced neighborhoods; the tension between the economic and social goals of housing policy; and the role that housing plays in various aspects of the lives of low- and moderate-income residents. Scholarship and the COVID-19 pandemic are raising awareness of the link between access to adequate housing and other rights and opportunities. This timely reader focuses attention on the results of past efforts and on the urgency of reframing the conversation. It is both an exciting time to teach students

about the evolution of United States' housing policy and a challenging time to discuss what policymakers or practitioners can do to effect positive change. This reader is aimed at students, professors, researchers, and professionals of housing policy, public policy, and city planning.
