curriculum into short page review sheets. In the author's time of instruction and study, he organized a collection of all reactions, mechanisms, processes, and concepts all studied in Biochemistry, Genetics, and Microbiology. Overall, this biochemistry study guide covers topics such as biomolecule structures (Protein, Carbohydrate, Nucleic Acids, and Lipids), biomolecules function, biomolecule metabolism (Protein Metabolism, Carbohydrate Metabolism, Nucleic Acid Metabolism, and Lipid Metabolism), physiological biochemical relationships, genetics, and biological/microbiological biochemical processes. Overall, the guide is organized into 1-3 page summaries of each specific topic, and acts as a study guide for those who hope to study individual concepts in detail. All sections include detailed diagrams, color coded notes, labeled illustration and detailed descriptions for effective comprehension. In addition to class studies, many students also have used this study

guide as an MCAT review guide. The short and condensed review pages have helped many student organize and categorize important topics, as they continue to study for the MCAT. Ultimately, this organized set can be extremely useful for students review, especially before class exams, school projects, standardized test, and much more!
