**BOMA Experience Exchange Report 2000**

**Third NCB International Seminar on Cement and Building Materials 1991**

The Principal as School Manager William L. Sharp 2012-11-03 Designed to teach the principal to efficiently and effectively accomplish noninstructional roles, the third edition of *The Principal as School Manager* offers advice on expectations and survival techniques to ensure the principal's longevity in the district. Like the previous editions, this book is an essential guide to practice and procedure. Its chapter on school legal issues will be especially useful for principals dealing with improper Internet usage, drug testing, and off-campus searches. Other chapters will explain the role of the assistant principal, the importance of maintaining safe schools in a climate of violence, and the relationship between the principal and the superintendent. This third edition contains new chapters and sections on managing the school curriculum, special education, classroom walk-throughs, creating a healthy school environment, and cyberbullying. Appropriate also for graduate courses on the principalship, educational administration, educational leadership, and personnel administration, *The Principal as School Leader* is the go-to guide for both novice and veteran school principals.

New Advances in Building Information Modeling and Engineering

Management María de las Nieves González García 2023-07-31 This book explores the latest advances in the field of building management. Several chapters use new technologies such as the BIM methodology for collecting life cycle information and managing the maintenance of existing buildings, sharing valid historical and architectural heritage data, energy analysis of building envelopes, and planning new buildings or sustainable building practices. In addition, other tools are presented that focus on improving access to BIM information, open-source governance, mobile applications to accelerate information transfer, the use of blockchain, lean design methods, and open-source software to solve critical path problems. Some contributions feature the assessment of occupational risks in construction, as it is necessary to plan preventive measures based on risk assessments integrated throughout the construction process, which is another important element for the management of this sector.
