In addition, an up-to-date survey of in-patient units in the United Kingdom is included. The effects on units of recent changes in the organisation of health services, and the impact of recent judicial rulings and legislation, such as the Children Act, are discussed. In providing analyses of the work of psychiatrists, psychologists, nurses, social workers and speech therapists, the book points towards future

directions for professionals working in the field.

New Developments in Group Counseling ERIC Clearinghouse on Counseling and Student Services, Greensboro, NC. 1997 Group counseling is a rapidly changing field. This collection of 31 digests examines various aspects of group process and group counseling. The digests are arranged under different subject headings. In section 1, the nature of group work is examined, along with the evolution of group work training since 1990. The second section looks at application of theories in groups, highlighting such approaches as solution-focused counseling, impact therapy, and the use of gestalt psychodrama. The next heading explores groups in the schools and includes discussions of interferences to small group work, children of divorce, the use of creative arts, psychodrama techniques, and the inclusion of students with disabilities in group work. Working with adults and families is covered in section four. This section offers insights into helping older adults age, conducting parent education groups, multiple family group therapy, and multifamily group psychotherapy. Section five deals with group dynamics and group processes. Some of the suggestions here center on efficient therapy groups, using corrective feedback, using self-concept as an integrator of group process, and group psychotherapy and close friendships. A group model is also offered. Since many groups

accompany special circumstances, section six gives advice on handling clients experiencing grief, how to confront hostile behavior, group dynamics and problem members, interventions with ex-cultists, members with disabilities, and multicultural group counseling. The last two sections delve into teamwork and its importance in group work, and the education of groups and of group specialists. Contains an annotated bibliography of resources on group process and group counseling.
