Soil and Groundwater

Remediation Chunlong Zhang

2019-10-30 An introduction to  
the principles and practices of  
soil and groundwater

remediation Soil and

Groundwater Remediation

offers a comprehensive and up-  
to-date review of the  
principles, practices, and

concepts of sustainability of  
soil and groundwater

remediation. The book starts  
with an overview of the

importance of groundwater

resource/quality, contaminant  
sources/types, and the scope of  
soil and groundwater

remediation. It then provides  
the essential components of

soil and groundwater

remediation with easy-to-  
understand design

equations/calculations and the  
practical applications. The

book contains information on  
remediation basics such as

subsurface chemical behaviors,  
soil and groundwater

hydrology and

characterization, regulations,  
cost analysis, and risk

assessment. The author

explores various conventional  
and innovative remediation

technologies, including pump-  
and-treat, soil vapor extraction,

bioremediation, incineration,  
thermally enhanced

techniques, soil

washing/flushing, and

permeable reactive barriers.

The book also examines the

modeling of groundwater flow

and contaminant transport in saturated and unsaturated zones. This important book: Presents the current challenges of remediation practices Includes up-to-date information about the low-cost, risk-based, sustainable remediation practices, as well as institutional control and management Offers a balanced mix of the principles, practices, and sustainable concepts in soil and groundwater remediation Contains learning objectives, discussions of key theories, and example problems Provides illustrative case studies and recent research when remediation techniques are introduced Written for undergraduate seniors and graduate students in natural resource, earth science, environmental science/engineering, and environmental management, Soil and Groundwater Remediation is an authoritative guide to the principles and components of soil and groundwater remediation that is filled with worked and practice problems.
