Advancing gender equality through agricultural and environmental research: Past, present, and future Pyburn, Rhiannon, ed. 2021-11-02 Over the past decade, interest in gender equality and women's empowerment has grown rapidly, creating a unique opportunity to institutionalize gender research within agricultural research for development. This book, edited by researchers from the CGIAR Gender Platform, reviews and reflects on the growing body of evidence from gender research. It marks a shift a way from a traditional focus on how gender analysis can contribute to improved productivity, flipping the question to ask,

How does agricultural and environmental research and development contribute to gender equality and women's empowerment? Chapters synthesize the wide range of CGIAR and other research in this area, covering breeding research and seed systems, value chain participation, nutrition-sensitive agriculture, natural resources, climate adaptation and mitigation, the "feminization" of agriculture, women's role in agricultural research, and emerging gender transformative approaches.
