Atlas of the World's Religions Ninian Smart 2007 This superbly illustrated reference work remains the only comprehensive visual guide to the world's religious traditions. With text by leading experts and lavish photography, thematic maps, tables, and charts, the Atlas of the World's Religions, second edition ranges from the travels of the Buddha to the geographical distribution of modern indigenous faiths, providing a full and informative picture of world religion, both past and present. Through almost 200 full-color maps, organized in a beautifully designed series of double-page spreads, this marvelous atlas shows the historical development and present state of all the world's major religions, with color illustrations that show temples, sites, ceremonies and works of art connected with religious life. The updated and expanded second edition provides a comprehensive overview of the major events over time that influenced the geographical development of the world's religions, and it provides a global and regional assessment of religion in the modern world. There are eight entirely new double-page spreads that illuminate such topics as the spread of the Latter-day Saints throughout the world, Pentecostal Christianities today (perhaps numbering more than 500 million adherents, or nearly one-fourth of the global Christian population), contemporary diasporic communities, South American religions, and much more. The second edition will also include extensive updates to many page spreads, 20,000 new words of text, fresh maps and illustrations, a revised introduction by the new editor, Frederick Denny, an expanded glossary and index, and a list of additional resources, all of which further enhance the value of the book. Both a treasury of information and an exhilarating visual feast, Atlas of the World's Religions, Second Edition is an essential reference work for anyone interested in faith around the globe.

Without a Doubt Kenneth Richard Samples 2004-07 Without a Doubt provides answers to tough questions about Christianity that assure the heart and satisfy the mind of Christian, seeker, and skeptic alike.

A Concise Introduction to World Religions Willard Gurdon Oxtoby 2007 In addition to abridging the contents of the two best-selling World Religions volumes (Eastern Traditions and Western Traditions), contributors to this concise-volume text have reworked the original material to focus on six specific areas of analysis: the major origins of the movement; the crystallization of its teachings; the major divisions within the tradition; how adherents practice their faith; cultural expressions; and how the tradition has responded to the various changes - intellectual, social, technological - of modern times. This more structural approach will make it easier for students to compare and contrast traditions, resulting in a solid, well-rounded introduction to the study of world religions.

The World's Religions, Revised and Updated Huston Smith 2009-03-17 The World's Religions, by beloved author and pioneering professor Huston Smith (Tales of Wonder), is the definitive classic for introducing the essential elements and teachings of the world's predominant faiths, including Hinduism, Buddhism, Confucianism, Taoism, Judaism, Christianity, Islam, as well as regional native traditions. This revised and updated edition provides sympathetic descriptions of the various traditions, explaining how they work "from the inside," which is a big reason why this cherished classic has sold more than two million copies since it first appeared in 1958.

Museums of World Religions Charles Orzech 2020-05-14 Critically examining the notion of 'world religions', Charles D. Orzech compares five purpose-built museums of world religions and their online extensions. Inspired by the 19th and 20th century discipline of comparative religion, these museums seek to promote religious tolerance by representing religious diversity and by arguing for underlying kinship

among religions. From locations in Europe (Marburg, Glasgow and St Petersburg), to North America (Quebec) to Asia (Taipei), each museum advances a particular cultural history. This book shows how the curation of the objects they contain shapes public perceptions of religion, giving material form to the discourses about religion and world religions. Raising important questions about religion and secularity, museum displays and religious piety, *Museums of World Religions* questions the ideology that informs these museums. Building on recent anthropological work on the agency of religious objects, the author critiques these museums and suggests new approaches to displaying the matter of religion.

African Traditional Religions (ATRs) has been included in this survey to provide background for the religious traditions and cultures of peoples of Africa as Christianity moves inexorably southward. The book has been written with undergraduate general education students in mind—including meeting the needs of those in seminaries and theological institutes.
