potentially controversial field of early literacy education. It aims to offer scholars and practitioners an analysis of how and why handwriting skills benefit early literacy learning, especially spelling acquisition, and how this can enrich experiences for children and educators. Offering global perspectives from the field, the volume integrates current theories with up-to-date research and practice, revealing how we can best support children's early literacy learning with handwriting and visual-motor skills interventions. Key topics covered include: The fundamentals of handwriting skills and literacy acquisition; Global literacy and spelling; Dysgraphia, handwriting difficulties, and dyslexia; Spelling and writing in the digital age; Home learning environment and spelling; Instruction and interventions for spelling and writing. This comprehensive survey will be essential reading for scholars and students of developmental psychology, education, and literacy research.

Improving Early Literacy Outcomes Nic Spaul 2019-05-15 Learning to read and write for meaning and pleasure are arguably the two most important competences that children acquire in primary school. Yet, in 2019 more than one half of children worldwide do not reach this first rung on the literacy ladder. Improving Early Literacy Outcomes aims to address this head-on, by foregrounding the work of more than 40 researchers, most of them living in, and working on, developing countries. Their contributions illuminate, magnify, and discover anew the importance of improving early reading, through precise alignment of curriculum, teaching, and assessment, and with a special focus on some of the most under-studied countries in the world (e.g., Burkina Faso, Niger, and Senegal). Through probing analyses of research, policy, and practice, the book highlights the common experiences of high aspirations repeatedly confronting harsh realities. Sixteen interconnected chapters cast an ever-vigilant and deflationary eye on the temptation to take an unrealistic approach to early literacy, and also caution against lumping all languages, contexts, and policy-challenges into a single heap. This book provides an indispensable guide to policymakers, practitioners, educators, and academics working towards the realisation of the UN Sustainable Development Goals (SDGs). Improving the teaching, learning, and assessment of early grade literacy is key not only to expanding the quality, access, and equity of education, but also to unlocking all the other SDGs, and ultimately to driving development.
