International Encyclopedia of Education 2009-04-17 The field of education has experienced extraordinary technological, societal, and institutional change in recent years, making it one of the most fascinating yet complex fields of study in social science. Unequaled in its combination of authoritative scholarship and comprehensive coverage, *International Encyclopedia of Education*, Third Edition succeeds two highly successful previous editions (1985, 1994) in aiming to encapsulate research in this vibrant field for the twenty-first century reader. Under development for five years, this work encompasses over 1,000 articles across 24 individual areas of coverage, and is expected to become the dominant resource in the field. Education is a multidisciplinary and international field drawing on a wide range of social sciences and humanities disciplines, and this new edition comprehensively matches this diversity. The diverse background and multidisciplinary subject coverage of the Editorial Board ensure a balanced and objective academic framework, with 1,500 contributors representing over 100 countries, capturing a complete portrait of this evolving field. A totally new work, revamped with a wholly new editorial board, structure and brand-new list of meta-sections and articles Developed by an international panel of editors and authors drawn from senior academia Web-enhanced with supplementary multimedia audio and video files, hotlinked to relevant references and sources for further study Incorporates ca. 1,350 articles, with timely coverage of such topics as technology and learning, demography and social change, globalization, and adult learning, to name a few Offers two content delivery options - print and online - the latter of which provides anytime, anywhere access for multiple users and superior search functionality via ScienceDirect, as well as multimedia content, including audio and video files

Social Work in Social Change Nicci Earle 2008 This study forms part of a series of studies on professions and professional education being conducted by the HSRC's research programme on Education, Science & Skills Development. It follows a pilot study on medical doctors, published in 2006 entitled *Doctors in a Divided Society: The profession and education of medical practitioners in South Africa*. Like the other studies in the series, this study involved developing an understanding of the professional milieu and professional labour market of social workers. As the implementers of government social policy, social work professionals have been at the forefront of grappling with the practicalities of the changes in focus, approach and methods of social security and social service delivery since 1994. It examines developments in the education and training of social workers within the democratic dispensation, the most significant of which is the development of a national, standardised Bachelor of Social Work degree. The study also reveals that the dominant profile in student enrolment and graduation statistics has changed from white female to African female, and that enrolment has increased significantly. However, the study also shows that graduation trends have been negative and losses due to emigration are an additional concern. Given the scarcity of these professionals against the demand for their services, understanding the factors that contribute to this picture are critical to effective intervention.

Financing Higher Education Worldwide D. Bruce Johnstone

2010-06-07 Examines the universal phenomenon of cost-sharing in higher education -- where financial responsibility shifts from governments and taxpayers to students and families. Growing costs for education far outpace public revenue streams that once supported it. Even with financial aid and scholarships defraying some of these costs,

students are responsible for a greater share of the cost of higher education. Shows how economically diverse countries all face similar cost-sharing challenges. While cost-sharing is both politically and ideologically debated, it is imperative to implement it for the financial health of colleges and universities From publisher description.

Social Justice and Education in the 21st Century Willie Pearson Jr. 2021-04-10 The world is not an equal place. There are high- and low-income countries and high- and low-income households. For each group, there are differential educational opportunities, leading to differential educational outcomes and differential labor market opportunities. This pattern often reproduces the privileges and inequalities of groups in a society. This book explores this differentiation in education from a social justice lens. Comparing the United States and South Africa, this book analyzes each country's developmental thinking on education, from human capital and human rights approaches, in both primary and higher education. The enclosed contributions draw from different disciplines including legal studies, sociology, psychology, computer science and public policy.
