Glencoe Earth Science Ralph M. Feather 1999 Earth science is the study of Earth and space. It is the study of such things as the transfer of energy in Earth's atmosphere; the evolution of landforms; patterns of change that cause weather; the scale and structure of stars; and the interactions that occur among the water, atmosphere, and land. Earth science in this book is divided into four specific areas of study: geology, meteorology, astronomy, and

oceanography. - p. 8-9.

Earth Science Made Simple Edward F. Albin,

Ph.D. 2010-04-28 We see it every day, yet we understand so little about Earth. From minerals to meteorites, this book covers every aspect of the science of our world. It breaks this complex discipline into four major sections: geology, oceanography, meteorology, and planetary science, and it gives an overview of the processes of each. Complete with interactive experiments and a glossary, this book makes the study of our planet—and other planets—easier than ever.

Instructor's Guide to Geology, Resources, and Society, an Introduction to Earth Science by H.W. Menard Henry William Menard 1974

Creation: Myth or Miracle? Dr. Barry A. Bunting 2019-03-11 The question this work addresses is this: given our current state of knowledge, are any of the major religion's creation accounts accurate, or are they all myths and fables that don't hold up to close examination? This work makes three assumptions. Assumption no. 1—If there is a creator and he provided a creation account, then he should be able to get it right. After all, he was supposed to be there! Assumption no. 2—If there is a creator, then one of the four major religions, each of which has survived a thousand years or more, is the most likely place to look for a legitimate creation account, a message from our creator. It is safe to say any creator capable of creating us and the universe we live in should be capable of accurately revealing his existence. Assumption no. 3—If we do find an ancient (pre-science) creation account that makes a substantial number of scientific, factually accurate statements—not just a few lucky guesses—but facts that were unknowable at the time the account was written, then we can reasonably conclude there must be a creator who revealed these facts.
